HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise applications, handling cross-service data exchange and implementing request validation patterns, processing approximately 1,500 requests per minute during peak hours.
- Engineered **Python** scripts to automate ETL processes for scheduled reporting, transforming and loading data from relational databases into analytical data stores, reducing manual data preparation time by 40% for the operations team.
- Managed production support for critical enterprise applications using **Splunk** and **Dynatrace** for monitoring and incident response, contributing to maintaining service level agreements for core business systems.
- Participated in **Agile and Scrum** ceremonies, including sprint planning and daily stand-ups, contributing to technical estimations and code reviews for new feature development.
- Designed and implemented **object-oriented design methodologies** and software design principles in **Java** code, ensuring maintainability and scalability of application components.
- Contributed to **test-driven development** practices by writing unit tests with **JUnit**, achieving over 85% code coverage for new modules and ensuring code quality before deployment.
- Containerized multiple **Java Spring Boot** microservices using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource allocation.

SKILLS

Languages – Java, Python, JavaScript, SQL, C++, R

Frameworks/Libraries – Spring Boot, Spring, React, Angular, Hibernate, JPA, scikit-learn, pandas, NumPy, Flask, FastAPI, JUnit, Mockito

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Linux, Power BI, Tableau

Methodologies – Agile, Scrum, Object-Oriented Design, Test-Driven Development

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Refactored legacy **Java EE** components into **Spring Boot** microservices, improving system modularity and reducing deployment complexity for a critical financial operations platform.
- Implemented persistence layers using **Hibernate** and **JPA**, optimizing database interactions and ensuring data integrity across multiple relational schemas, supporting over 5,000 daily transactions.
- Developed RESTful APIs in **Java** to facilitate inter-service communication, enhancing data flow and integration capabilities between different modules of the enterprise system.

Automated Data Pipeline for Operations Reporting (HCL Technologies)

- Designed and built an automated **Python** data pipeline to extract, transform, and load data from operational databases into a data warehouse for generating weekly business intelligence reports.
- Utilized **pandas** and **SQL** to process and aggregate large datasets, ensuring data accuracy and consistency for downstream analytical dashboards and stakeholder consumption.
- Scheduled and monitored pipeline execution using cron jobs on **Linux**, ensuring reliable data delivery for timely operational decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
