HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained automation tooling for **Kubernetes** cluster lifecycle management, configuration, and upgrades using **Go**.
- Designed and built foundational capabilities for the cloud-native ecosystem, focusing on **Kubernetes** networking, storage, and security layers.
- Collaborated with SRE and application teams to deliver scalable platform capabilities, ensuring high availability and performance of cloud services.
- Participated in on-call rotations and incident response, conducting post-incident reviews to identify root causes and implement preventative measures.
- Engineered **Python** scripts for automating data ingestion and ETL processes, improving data pipeline efficiency by approximately **30%**.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations via **Jenkins** pipelines.

SKILLS

Languages – Go, Python, Java, SQL, R

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), GCP, Azure

Containerization & Orchestration – Kubernetes, Docker

CI/CD & IaC – Jenkins, Terraform, Git

Observability – Prometheus, Grafana, OpenTelemetry, Splunk, Dynatrace

Databases – PostgreSQL, MySQL, Oracle

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

PROJECTS

Kubernetes Platform Automation Suite

- Developed a suite of **Go**-based automation tools for managing the lifecycle of **Kubernetes** clusters on **AWS**, including provisioning, scaling, and upgrades.
- Implemented custom controllers within the Kubernetes API to automate resource management and enforce platform policies for multi-tenant environments.
- Integrated observability tools like **Prometheus** and **Grafana** for monitoring cluster health and performance, enabling proactive issue detection.

Enterprise Data Pipeline Orchestration

- Designed and built scalable data pipelines using **Python** and **pandas** to ingest and transform data from various enterprise systems into a central data warehouse.
- Automated scheduled reporting tasks, reducing manual effort by an estimated **40%** and improving data delivery timeliness for business stakeholders.
- Managed data transformations and validation using **SQL** queries across **PostgreSQL** and **Oracle** databases, ensuring data integrity.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
