HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and delivered **C++** client applications across multiple platforms, focusing on **memory management**, **concurrency**, and **performance optimisation** for a large-scale collaboration product.
- Owned the technical direction for a **Qt/QML**-based UI domain, making architectural decisions that balanced **customer needs**, **maintainability**, and **long-term platform health**.
- Mentored and guided a team of 4 engineers on **modern C++** development practices, **code quality standards**, and **systematic testing strategies** for complex features.
- Partnered with **Product Management** and **Design** teams from discovery through delivery, translating customer needs into clear **technical strategies** and influencing the product roadmap.
- Contributed hands-on to critical **C++** designs and code, leading **code reviews** and solving complex **engineering problems** within the Webex client codebase.
- Championed **AI-assisted workflows** for development tasks, including **test generation** and **debugging**, resulting in a **15% improvement** in engineering effectiveness for the team.
- Containerised **C++** client build tooling and deployed to a **Kubernetes** cluster on **AWS**, managing **CI/CD pipelines** with Jenkins for consistent, reliable releases.

SKILLS

Languages – C++, Python, SQL, Java

Client Development – Qt/QML, C++ Concurrency, Memory Management, Performance Tuning, Debugging, Maintainability, UI Architecture, Responsive Design, Accessibility

Cloud & DevOps – AWS, Kubernetes, Docker, Jenkins, CI/CD, Git, Linux Shell Scripting

Methodologies – Agile, Scrum, Technical Leadership, Mentorship, Code Reviews, System Design, Architectural Decision Making, Stakeholder Management

AI & Machine Learning – AI-Assisted Development, Test Generation, Debugging Assistance

PROJECTS

Webex Client Platform Modernisation (HCL Technologies)

- Refactored core **C++** components of an enterprise collaboration client, improving **startup time** by **18%** through targeted **performance optimisation** and **memory management** techniques.
- Implemented a **new UI module** using **Qt/QML**, focusing on **responsive design** and **accessibility** standards to enhance user experience for enterprise customers.
- Developed **Python scripts** to automate the testing of **C++** client builds across different operating systems, reducing manual testing effort by **30%**.

AI-Assisted C++ Development Tooling (HCL Technologies)

- Built a **FastAPI** service in Python to integrate AI tools for **code generation** and **bug detection** within the **C++** development workflow.
- Designed and implemented **CI/CD integration** for the AI tooling, enabling developers to use AI suggestions directly within their **code review** process.
- Deployed the AI tooling as a **Docker** container on **AWS**, providing a scalable solution for the engineering team of 12.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
