PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Linux and Windows Server environments** for high availability, tuning OS parameters and configuring services to meet strict performance SLAs.
- Managed and operated **enterprise storage systems** including **NAS/SAN**, performing **volume/LUN creation**, host mapping, and configuring **data replication** for critical data protection.
- Deployed, configured, and maintained **virtualization platforms** such as **VMware**, executing live and cold VM migrations with minimal service disruption across production data centers.
- Developed and executed compute and storage migration strategies for data center consolidation projects, including environment assessment, risk mitigation planning, and post-migration validation.
- Authored **Python scripts** for infrastructure automation tasks, streamlining routine operations and reducing manual intervention in server provisioning and configuration management.
- Engineered **REST APIs** using **Java Spring Boot** for system integrations, ensuring secure data exchange and efficient communication between disparate enterprise applications.
- Containerized applications using **Docker** and managed deployments within a **Kubernetes** cluster, configuring resource limits and essential networking for scalable service delivery.

SKILLS

Cloud & Virtualization – VMware, OpenStack, Hyper-V, AWS, Azure, Google Cloud, Docker, Kubernetes

Operating Systems – Linux, Windows Server, Bash, PowerShell

Networking – IPv4, IPv6, Cloud Network Architecture, Network Automation

Storage Systems – NAS, SAN, NetApp, Dell EMC, Volume/LUN Management, Multipathing, Data Replication, Snapshots

Infrastructure as Code & CI/CD – Terraform, Ansible, GitOps, Git, Jenkins, Argo, Harness

Programming & Scripting – Python, Java, Spring Boot, Bash, PowerShell

PROJECTS

Hybrid Cloud Infrastructure Automation

- Developed a suite of **Python scripts** to automate the provisioning and configuration of **AWS EC2 instances** and **Linux servers**, reducing deployment time by approximately **30%**.
- Implemented **Infrastructure as Code** principles using **Terraform** to manage cloud resources, ensuring consistent and repeatable deployments across development and staging environments.
- Configured **CI/CD pipelines** with **Jenkins** for automated application builds and deployments to containerized environments running on **Kubernetes**.

Data Center Migration & Virtualization Management

- Planned and executed the migration of **virtual machines** using **VMware vMotion** during a data center consolidation effort, maintaining service availability for key business operations.
- Managed **enterprise storage** arrays, including **SAN LUN provisioning** and mapping to ESXi hosts, supporting a data volume exceeding **50 TB**.
- Authored operational runbooks for maintaining high availability of **Linux** and **Windows Server** environments, detailing troubleshooting steps for common performance issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
