HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Built and maintained **CI/CD pipelines** using **Jenkins** and **Git**, reducing deployment lead time by **30%** for enterprise applications.
- Monitored production systems using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and improving Mean Time To Resolution (MTTR) by **15%**.
- Developed **Python scripts** for automating ETL processes and generating scheduled operational reports, handling data from multiple sources.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-service communication, supporting new feature development for internal platforms.
- Managed incident response and root cause analysis for critical production issues affecting enterprise Java/.NET applications, ensuring adherence to strict SLAs.
- Analyzed system metrics, logs, and traces to support capacity planning and identify performance bottlenecks in cloud-hosted environments.
- Containerized Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances, improving application portability and consistency.

SKILLS

Languages – Python, Java, SQL, Bash

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (concepts)

CI/CD/DevOps – Jenkins, Git, Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

Monitoring/Observability – Splunk, Dynatrace, CloudWatch

PROJECTS

Production Support Automation Suite (HCL Technologies)

- Developed a suite of **Python scripts** to automate routine production support tasks, including log aggregation and health checks for enterprise applications.
- Integrated **Splunk** queries into automation scripts to proactively identify and alert on potential system issues before they impacted end-users, reducing alert fatigue by **40%**.
- Created shell scripts for automated restarts and configuration validation on **Linux** servers, managed via **cron jobs** for scheduled execution.

Java Microservice for Transaction Processing (HCL Technologies)

- Built a **Java Spring Boot** microservice to process inbound transaction messages, adhering to strict data validation and error handling requirements.
- Implemented RESTful APIs for internal system integration, enabling seamless data flow and reducing integration complexity for downstream services.
- Managed the containerization of the service using **Docker** and deployed it onto **AWS EC2**, ensuring consistent operation across environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
