HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts for data ingestion, transformation, and automation, supporting ETL processes for enterprise systems.
- Designed and built **ETL/ELT data pipelines** using **Python** and **SQL**, incorporating error handling and retry logic to ensure production reliability.
- Wrote complex **SQL queries** to extract, transform, and validate data from relational databases and cloud storage, including the use of CTEs and window functions.
- Collaborated with senior data engineers and analysts to refine requirements, translating business data needs into technical specifications for scalable data solutions.
- Supported data pipeline orchestration using **Azure Data Factory**, configuring triggers, Linked Services, and pipeline scheduling for automated data flows.
- Created and executed data validation checks, including row counts, null checks, and referential integrity, to maintain data quality across multiple pipelines.
- Contributed to testing and deployment activities, including unit testing, integration testing, and production release support for new data pipeline features.

SKILLS

Cloud Platforms – Azure Databricks, Azure Data Factory, Azure Data Lake Storage Gen2, Azure SQL, Blob Storage, Event Hubs, Key Vault

Programming & Scripting – Python, SQL

Data Engineering Concepts – ETL/ELT, Data Pipelines, Medallion Architecture, Delta Lake, Lakehouse Architecture, Data Quality, Data Governance, Data Modelling, Relational Databases

Orchestration & Workflow – Azure Data Factory

Version Control – Git

BI & Reporting – Power BI, DAX

PROJECTS

Enterprise Data Lakehouse Implementation (HCL Technologies)

- Designed and implemented a **data lakehouse architecture** using **Azure Databricks** and **Delta Lake** to consolidate data from disparate sources.
- Developed **Python** scripts and **SQL** queries for data ingestion and transformation, adhering to **Medallion Architecture** principles (Bronze, Silver, Gold layers).
- Documented data pipelines, transformation logic, and data dictionaries, ensuring clear process notes for team use and knowledge transfer.

Financial Transaction Data Pipeline (HCL Technologies)

- Built and maintained **ETL pipelines** in **Python** to process and validate financial transaction data for an operations dashboard.
- Wrote **SQL queries** against **PostgreSQL** to extract and aggregate transaction flow information, supporting reconciliation workflows.
- Implemented robust error handling and logging mechanisms to monitor pipeline health and troubleshoot data quality issues for enterprise customers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
