HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built scalable **Databricks data pipelines** to ingest and transform high-volume data streams into the data lake, processing approximately **1.5 TB of data daily**.
- Developed and optimized **ETL/ELT workflows** using **Airflow** for automated data ingestion and transformation, reducing manual intervention by **40%**.
- Managed and enhanced cloud-based data platforms on **AWS**, focusing on performance tuning, security hardening, and cost optimization strategies.
- Implemented and maintained **data quality**, governance, and lineage frameworks using **Atlan** and custom monitoring scripts to ensure trusted and compliant data assets.
- Partnered with business stakeholders and BI teams to design **data models** and deliver analytics-ready datasets, supporting critical reporting and decision-making processes.
- Collaborated with senior data engineers and architects to ensure high-quality delivery of data assets, contributing to the design of scalable data warehouse solutions.
- Containerized data pipeline components using **Docker** and deployed them to an **AWS EKS** cluster, ensuring consistent environments and simplified deployment cycles.

SKILLS

Data Engineering Tools – Databricks, Airflow, dbt, PowerBI

Cloud Platforms – AWS (EC2, S3, Lambda, EKS, CloudWatch), Azure, GCP

Data Warehousing & Lake – Data Lake, Data Warehouse, Data Modelling, SQL, PostgreSQL, MySQL, Oracle

Data Quality & Governance – Atlan, Monte Carlo, Data Quality, Data Governance, Data Lineage, Data Monitoring

Programming & Scripting – Python, SQL, Shell Scripting

Containerization & Orchestration – Docker, Kubernetes (EKS)

PROJECTS

Scalable Data Lakehouse for Financial Reporting

- Architected and implemented a **Databricks Lakehouse** solution to consolidate disparate financial data sources, enabling unified reporting and analytics.
- Developed robust **Python ETL pipelines** to ingest and transform structured and semi-structured financial transaction data, supporting reconciliation workflows with **~99.8% data accuracy**.
- Designed and implemented **data models** optimized for analytical queries, reducing report generation times for key business metrics by **30%**.

Automated Data Quality Monitoring Framework

- Built an automated **data quality** monitoring framework using **Python** and SQL queries against PostgreSQL, identifying and alerting on data anomalies in near real-time.
- Integrated the framework with **Airflow** for scheduled execution and reporting, providing daily summaries of data integrity issues to operational teams.
- Developed custom dashboards in **Power BI** to visualize data quality trends and track remediation efforts, improving visibility for data governance stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
