PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to the safe design and operation of equipment within the clean utility systems area, participating in **hazard reviews** and **pre-start-up safety reviews** to enhance safety awareness.
- Gained exposure to establishing and monitoring **critical parameters** for clean utility systems, supporting processes remaining in a qualified and controlled state.
- Supported troubleshooting efforts for unit operations and equipment failures under guidance, documenting events and contributing to resolution through appropriate actions.
- Evaluated activities for their impact on the **qualified state** of unit operations and equipment, applying formal **change control processes**.
- Participated in **Periodic Reviews** for systems and equipment, ensuring ongoing compliance and reliability.
- Developed an understanding of equipment reliability issues by analyzing operational data, identifying opportunities for **process improvements** and system upgrades.
- Contributed to the scoping of **capital projects** targeted at short and longer-term needs, acting as a user representative for local project initiatives.

SKILLS

Core Responsibilities – Clean System Operations, Equipment Maintenance, Process Improvement, Problem-Solving, Safety Culture, Change Control, Reliability Analysis.

Biotech Manufacturing Support – Clean Utility Systems, Grey Systems, Unit Operations, Bio-process Technical Support, IQ/OQ/PQ, Commissioning.

Engineering Tools & Methodologies – Root Cause Analysis, Hazard Reviews, Pre-start-up Safety Reviews, Periodic Reviews, Asset Management, Capital Project Scoping.

Collaboration & Communication – Cross-functional Teamwork, Stakeholder Communication, Operations Personnel, Crafts Personnel, Mentoring.

General IT & Software – Jira, Confluence, Microsoft Office Suite.

PROJECTS

Clean Utility System Monitoring and Control

- Developed a Python-based monitoring system to track critical parameters for clean utility systems, integrating with existing data sources to provide real-time operational status.
- Implemented automated alerts for deviations from qualified operating ranges, reducing manual oversight by **40%** and ensuring timely response to potential issues.
- Designed data logging mechanisms to capture operational history for compliance and future analysis, contributing to the maintenance of a qualified state.

Equipment Reliability Analysis Dashboard

- Created a Power BI dashboard to visualize equipment performance metrics and failure history for key utility systems, consolidating data from various logs.
- Analyzed trends in equipment downtime and maintenance records to identify recurring issues and propose targeted reliability improvements, reducing unscheduled downtime by approximately **15%** over a 6-month period.
- Presented findings and recommendations to the engineering and operations teams, facilitating data-informed decisions on maintenance strategies and upgrades.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
