# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and developed enterprise automation solutions using **UiPath** and **Microsoft Power Platform**, integrating with core business applications to streamline operational workflows.
- Built AI-enabled automation prototypes incorporating **intelligent document processing** and **Generative AI** for text summarization tasks, reducing manual review time by approximately **40%**.
- Developed and integrated automation solutions with enterprise APIs and data sources, enabling seamless data exchange and process orchestration across disparate systems.
- Took technical ownership of automation solutions from concept to production, establishing reusable development patterns and engineering standards for a team of 5 engineers.
- Provided technical guidance and mentorship to junior engineers on best practices for automation development and AI integration within the team.
- Collaborated with business stakeholders to gather requirements for new automation initiatives, translating them into technical designs and implementation plans.
- Containerized automation services using **Docker** and deployed them to an **AWS** environment, ensuring scalability and efficient resource utilization.

## SKILLS

**Automation Platforms** – UiPath, Microsoft Power Platform, Tungsten Automation

**AI & Generative AI** – Generative AI, Intelligent Document Processing, Agentic AI, Knowledge Discovery, Summarisation

**Core Engineering** – APIs, System Integration, Enterprise Applications, Source Control, Testing, CI/CD

**Programming Languages** – Python, Java

**Cloud & DevOps** – AWS, Docker, Kubernetes

**Data & Analytics** – SQL, Power BI, Data Modelling

## PROJECTS

### Enterprise Document Processing Automation

- Developed an automated system using **UiPath** to extract key information from ~5,000 invoices per month, reducing manual data entry by over **60%**.
- Integrated an **intelligent document processing** component to handle unstructured data within scanned documents, improving data capture accuracy for complex layouts.
- Established a CI/CD pipeline for the automation workflows, enabling faster deployment and testing cycles for new features and bug fixes.

### Generative AI-Powered Knowledge Assistant

- Built a prototype knowledge assistant using **Python** and **Generative AI** models to summarize technical documentation and support queries, providing answers in under **15 seconds**.
- Implemented retrieval-augmented generation (RAG) patterns to integrate internal knowledge bases, enhancing the relevance and accuracy of AI-generated responses.
- Designed a REST API using **FastAPI** to serve the AI assistant's functionality, allowing integration with other enterprise applications.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
