PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python**-based ETL pipelines on **AWS Lambda** and **S3**, processing approximately **3,500 events/sec** during peak hours to replace a legacy batch job.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Supported production environments for enterprise applications using **Splunk** and **Dynatrace** for monitoring, incident response, and SLA management across P1/P2 issues.
- Built, enhanced, and optimised cloud-based **ETL/ELT** pipelines and data integration processes using **Azure Databricks** and **Microsoft Fabric**.
- Developed and maintained **SQL Server** databases, including stored procedures, views, and performance-tuned solutions for enterprise data warehousing.
- Contributed to the modernisation of the Enterprise Data Warehouse from a traditional **SQL Server** architecture to a cloud-native **Lakehouse** architecture, implementing **Medallion** data models.
- Wrote production runbooks and internal documentation that reduced the average customer onboarding time from over 4 weeks to approximately 10 days.

SKILLS

Cloud Platforms – Azure Databricks, Microsoft Fabric, AWS (EC2, S3, Lambda, CloudWatch)

Data Warehousing & ETL/ELT – Lakehouse Architecture, Medallion Architecture, SQL Server, T-SQL, Power Query, Data Modelling, ETL/ELT Design

Programming & Scripting – Python, Java, Spring Boot, SQL, JIL Scripting

Orchestration & Automation – AutoSys, Workflow Orchestration, Scripting, CI/CD, Jenkins

Observability & Support – Splunk, Dynatrace, Production Support, Incident Management, Troubleshooting

Data Analytics & BI – Power BI, DAX, Tableau, R, pandas, NumPy, scikit-learn

PROJECTS

Enterprise Data Lakehouse Modernisation

- Designed and implemented a **Lakehouse architecture** on **Azure Databricks**, migrating data from on-premise **SQL Server**.
- Developed **Python** scripts for automated data ingestion and transformation, adhering to **Medallion** (Bronze, Silver, Gold) data model best practices.
- Optimised data processing workloads, reducing query execution times by an average of **30%** for critical reporting functions.

Automated Production Support & Monitoring Framework

- Engineered **Python** automation scripts to streamline log analysis and alert correlation, reducing manual investigation time by approximately **40%**.
- Developed custom dashboards in **Splunk** to provide real-time operational visibility into key application performance indicators, supporting **SLA** adherence for enterprise systems.
- Implemented automated incident response workflows that reduced the mean time to resolution for common P2 issues by an estimated **25%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
