PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed mechanical assemblies and engineered solutions for critical industrial applications, translating customer specifications into manufacturable designs.
- Produced detailed engineering drawings and manufacturing specifications using **SolidWorks**, ensuring compliance with stringent quality standards and GD&T; requirements.
- Carried out technical analysis and design reviews for new product development activities, contributing to iterative improvements and validation testing phases.
- Provided technical support to manufacturing and quality teams, resolving production issues and facilitating smooth integration of new designs into the assembly line.
- Led a key engineering project from concept development through implementation, managing timelines and cross-functional dependencies to meet project milestones.
- Mentored and guided junior engineers on design best practices, GD&T; application, and technical documentation standards within the team.
- Containerized and deployed a Java Spring Boot microservice for internal data processing onto an **AWS EC2** instance managed via **Jenkins** CI/CD pipelines.

SKILLS

Mechanical Design – Product Development, Engineering Calculations, Design Verification, GD&T;, Root Cause Analysis, CAD Design

Software & Systems – Java, Spring Boot, REST APIs, SQL, PostgreSQL, Docker, AWS EC2, Jenkins, Git

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Statistical Analysis, Applied Mathematics

Project Management – Agile/Scrum, Project Leadership, Stakeholder Management, Planning & Organisation

Domain Experience – Manufacturing, Regulated Environments, Enterprise Systems, Financial Services Operations

PROJECTS

Industrial Product Design & Validation (HCL Technologies)

- Designed a novel mechanical component for an industrial equipment client, focusing on improved durability and reduced manufacturing cost, using **SolidWorks** and performing FEA simulations.
- Developed comprehensive engineering calculations and design verification documentation, including stress analysis and thermal load assessments, to support product certification.
- Collaborated with the client's engineering team to refine requirements and presented design iterations, ensuring alignment with technical specifications and performance targets.

Automated Reporting Pipeline (HCL Technologies)

- Engineered a **Python**-based ETL pipeline to automate the extraction, transformation, and loading of operational data from PostgreSQL into a data warehouse for enhanced analytics.
- Built interactive **Power BI** dashboards to visualize key performance indicators related to system uptime and transaction processing, providing stakeholders with actionable insights.
- Implemented scheduled data refreshes and data quality checks using **SQL** queries and **pandas**, ensuring data integrity for downstream reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
