HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and optimized **Envoy** configurations for high-traffic edge platforms, improving global traffic flow efficiency by **18%**.
- Developed **Rust** microservices to enhance security protocols for a large-scale distributed system, processing over **5,000 requests per second**.
- Refactored legacy C++ codebases into modern **Go** services for critical infrastructure migration, ensuring zero impact on live production traffic.
- Triage technical issues reported in team Slack channels, providing rapid analysis and resolution paths for production incidents.
- Authored and refined detailed production runbooks and engineering documentation for edge traffic and security platforms.
- Designed and implemented **eBPF**-based filtering rules to bolster WAF capabilities and mitigate DDoS attacks.
- Managed system configuration changes using change-control processes, coordinating UAT and post-go-live support across interconnected systems.

SKILLS

Edge & Traffic Management – Envoy, HAProxy, IPVS, eBPF, WAF, CDNs, Load Balancers, Routing, Rate Limiting, TLS/mTLS

Programming Languages – Go, Rust, C++, C, Python, Java

Distributed Systems & Networking – TCP/IP, HTTP, DNS, L4 to L7 Protocols

Infrastructure & Operations – Docker, Kubernetes, Linux, CI/CD, Jenkins, Git, AWS, CloudWatch

Security & Migration – Zero Trust, mTLS, DDoS Mitigation, Legacy System Migration, Production Traffic Management

PROJECTS

Edge Security Platform Enhancement (HCL Technologies)

- Developed **Go** components for an edge security platform, implementing **rate-limiting** logic to protect against traffic surges.
- Integrated **Envoy** proxy configurations to manage TLS termination for high-volume API traffic, ensuring secure communication.
- Collaborated with operations teams to monitor platform performance and address production issues, refining alerting thresholds.

Legacy System Modernization with Rust (HCL Technologies)

- Migrated key functionalities from a legacy C++ application to a new **Rust**-based microservice, improving code maintainability.
- Designed and implemented secure communication channels using **mTLS** between new services and existing infrastructure.
- Wrote comprehensive unit and integration tests in **Rust**, achieving **92% code coverage** for the new service.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
