PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Python scripts for automating data extraction and transformation tasks, processing approximately 50GB of raw data daily for downstream analytics.
- Designed and implemented REST APIs using **Java Spring Boot** for internal services, handling up to **1,500 requests per minute** during peak load times.
- Managed production support for enterprise applications on **AWS** infrastructure, focusing on incident response and SLA adherence for critical systems.
- Contributed to the design and implementation of software modules and data-processing components for analytics and optimisation software within the energy technology domain.
- Performed analytical tasks involving **time-series data** and optimisation workflows, researching relevant algorithms and mathematical concepts to enhance system performance.
- Collaborated with senior staff and customers to troubleshoot, debug, and improve system performance, managing assigned tasks with minimal guidance.
- Containerised applications using **Docker** for consistent deployment across development and production environments on **AWS EC2** instances.

SKILLS

Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Tools & Technologies – Linux, Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Concepts – Time-series data, Analytics workflows, Mathematical models, Optimisation, APIs, Data streams, Relational data modelling, Debugging

PROJECTS

Energy Data Analytics Platform Development (HCL Technologies)

- Engineered Python data pipelines to ingest and process large volumes of time-series data from energy sensors, supporting analytical and optimisation workflows.
- Developed RESTful APIs using **FastAPI** to expose processed energy data for consumption by customer-facing analytics dashboards, ensuring data integrity and timely delivery.
- Implemented automated testing for data processing modules, reducing critical data validation errors by **30%** across iterative development cycles.

Customer-Facing Analytics Dashboard Implementation (HCL Technologies)

- Collaborated with business analysts and customer representatives to gather requirements for an operational analytics dashboard focused on energy consumption patterns.
- Developed interactive visualisations and reports using **Power BI**, translating complex time-series data into actionable insights for stakeholders.
- Managed the deployment and configuration of the dashboard in a cloud environment, ensuring accessibility and performance for end-users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
