HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented event-driven data processing pipelines using **Python** and **AWS Step Functions**, orchestrating data ingestion from **S3** to **Redshift** for a data lake supporting over 10 million daily object updates.
- Developed and deployed business-critical APIs using **Python** and **AWS Lambda**, scaling to securely handle over 1000 transactions per second for thousands of enterprise customers.
- Contributed to a metadata-driven platform architecture using **Python**, focusing on **event-based distributed processing** and ensuring auditable data handling for additions, deletions, and corrections.
- Actively participated in peer code reviews and embraced a **shift-left testing** approach, collaborating with QA to enhance maintainability and quality throughout the development lifecycle.
- Engineered automated **CI/CD pipelines** with **Jenkins** and **Git**, enabling the rapid and reliable delivery of working code in an Agile Scrum environment.
- Analyzed and understood complex domain data to recommend improvements for existing data products, enhancing actionable insights for clients through holistic data aggregation.
- Containerised microservices using **Docker** and deployed them to **AWS ECS**, configuring basic resource limits for predictable performance and rollout on the data cloud platform.

SKILLS

Programming Languages – Python, Java, SQL, R

Cloud Platforms & Services – AWS (Lambda, ECS, S3, Redshift, Aurora, API Gateway, CloudWatch, X-Ray, Glue, Step Functions, SQS), Docker

Data Warehousing & ETL – Redshift, S3, AWS Glue, Power Query, Data Modelling, Data Warehousing

API Development & Frameworks – API Gateway, Spring Boot, FastAPI, Flask

Databases – PostgreSQL, MySQL, Oracle, DynamoDB

DevOps & CI/CD – Jenkins, Git, Airflow, Continuous Integration

Data Analysis & BI – Power BI, Tableau, DAX, pandas, NumPy, scikit-learn, R/RStudio

PROJECTS

Scalable Data Ingestion Platform (HCL Technologies)

- Designed and built a Python-based ELTL data pipeline to ingest and process over 10 million new data objects daily from various providers into an **AWS S3** data lake.
- Orchestrated data transformation and loading processes into **AWS Redshift** using **AWS Step Functions** and **SQS**, ensuring auditable data handling for updates and corrections.
- Developed monitoring dashboards in **CloudWatch** to track pipeline health and performance, identifying and resolving bottlenecks that reduced processing latency by **18%**.

High-Throughput API for Data Serving (HCL Technologies)

- Engineered **Python**-based RESTful APIs deployed on **AWS Lambda** behind **API Gateway** to serve processed data with low latency to thousands of customers.
- Implemented robust error handling and request validation mechanisms, scaling the API infrastructure to support over 1000 transactions per second during peak loads.
- Collaborated with business analysts to define API contracts and data structures, ensuring alignment with client data needs and improving data delivery speed by **30%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
