HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** to handle core backend logic for distributed systems, processing over **4,000 requests per minute**.
- Engineered **Python data pipelines** to automate ETL processes for large datasets, reducing manual data transformation effort by approximately **30%**.
- Implemented robust **SQL queries and database migrations** across PostgreSQL and MySQL for feature enhancements and data integrity checks.
- Designed and implemented **RESTful APIs** in Java Spring Boot for seamless integration between new and existing backend services, supporting a **15% increase** in data exchange throughput.
- Authored **Python scripts** to automate deployment tasks and system monitoring, improving the reliability of production deployments.
- Containerized backend services using **Docker** and deployed them to **AWS EC2 instances**, streamlining the development-to-production workflow.
- Contributed to the design and implementation of **scalable data pipelines** for processing real-time event streams, enhancing system observability.

SKILLS

Languages – Python, Java, SQL, Bash

Frameworks & Libraries – Spring Boot, Flask, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Tools & Technologies – Linux, Splunk, Dynatrace, Jira, Confluence, REST APIs, TCP/IP, UDP, HTTP

PROJECTS

Distributed Systems Backend for Game Services

- Developed a **Java Spring Boot backend** to manage player matchmaking and session data for a large-scale online game, supporting thousands of concurrent users.
- Implemented **RESTful APIs** for communication between game clients and backend services, ensuring low latency and high availability.
- Integrated **PostgreSQL** for persistent storage of player profiles and game state, designing schemas for efficient data retrieval.

Automated Data Processing Pipeline

- Created a **Python-based data pipeline** to ingest and process telemetry data from game servers, transforming raw logs into actionable insights.
- Utilized **pandas** and **NumPy** for efficient data manipulation and analysis, enabling faster reporting cycles for game performance metrics.
- Containerized the pipeline using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
