PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Led the **end-to-end deployment** of a fully containerized **AI platform** within client environments, supporting both **cloud (GCP, AWS)** and **on-prem deployments**.
- Designed and implemented **Git-based CI/CD pipelines** and automated testing frameworks, integrating **Agentic AI models** for intelligent server orchestration and system monitoring.
- Served as the primary **technical contact** for enterprise clients, troubleshooting complex production issues and providing detailed feedback to the core engineering team for R&D.;
- Developed, debugged, and optimized **Python-based Machine Learning/AI service layers**, including hybrid model ensembles for customer requests, contributing to a **15% reduction** in average issue resolution time.
- Managed **model versioning, tracking, and governance** using tools like **MLflow**, ensuring compliance and facilitating reproducible ML workflows for financial services clients.
- Collaborated with customer engineering teams to facilitate **safe, scalable, and transparent deployment** of Agentic AI applications, ensuring successful integration into their existing IT Service Excellence frameworks.
- Containerized core services and orchestration logic using **Docker** and deployed them to **Kubernetes clusters** (EKS), wiring up basic resource limits for predictable rollout and scaling.

SKILLS

Languages – Golang, Python, SQL

Cloud Platforms – AWS, GCP

Containerization & Orchestration – Docker, Kubernetes

MLOps & AI Tools – MLflow, ClearML, Agentic AI models

DevOps & CI/CD – Git, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum, MLOps

PROJECTS

AI Platform Deployment for Financial Services Client

- Led the technical integration of a containerized **AI platform** into a major financial institution's on-premise infrastructure, ensuring seamless operation with their existing IT systems.
- Developed custom **Python scripts** to automate data ingestion and pre-processing for ML model training, handling approximately **5,000 records per hour** during the integration phase.
- Configured and managed **Docker containers** and orchestrated deployments using **Kubernetes**, establishing CI/CD pipelines that reduced deployment cycles by **30%**.

ML Model Performance Monitoring and Governance

- Implemented a system for tracking and versioning ML models using **MLflow**, enabling detailed performance analysis and ensuring auditability for regulatory compliance.
- Built automated data pipelines in **Python** to extract features and feed them into a classification model for anomaly detection, processing datasets of up to **150,000 rows**.
- Trained a **scikit-learn** classifier on transaction data to identify potential policy violations, achieving an **AUC of 0.82** on a held-out test set.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
