HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and deployed **Python**-based ML pipelines on **AWS Lambda** and **S3**, processing approximately **3,500 events/sec** at peak load and replacing a legacy batch system.
- Implemented **CI/CD/CT pipelines** using **GitHub Actions** for automated model retraining and deployment, reducing manual deployment overhead by **40%**.
- Developed and maintained **model monitoring** frameworks using **Prometheus** and **Grafana**, tracking data drift and prediction quality for production ML services.
- Operationalized **Large Language Models (LLMs)** by integrating them with **prompt engineering platforms** and **vector databases**, enabling generative AI capabilities for enterprise clients.
- Containerized ML inference services using **Docker** and orchestrated them on **Kubernetes** (EKS), ensuring high availability and low latency for model serving.
- Collaborated with **data scientists** and **software engineers** to streamline model handoffs and accelerate the time-to-production for new AI features.
- Managed **feature stores** using **MLflow**, ensuring auditability and reusability of features across multiple ML development teams.

SKILLS

MLOps Platforms – MLflow, Kubeflow, BentoML, Ray, Triton Inference Server

LLMOps & GenAI – OpenAI, Azure OpenAI, vLLM, TGI, LangChain, RAG, Vector Databases

Cloud & Orchestration – AWS (EC2, S3, Lambda, EKS, CloudWatch), Azure, GCP, Kubernetes, Docker, Helm

CI/CD & IaC – GitHub Actions, GitLab CI, Jenkins, Terraform, Ansible

Monitoring & Observability – Prometheus, Grafana, Datadog, Evidently, Arize, Fiddler

Core Languages & Tools – Python, Shell Scripting, SQL, Git, Java Spring Boot

PROJECTS

MLOps Platform for Model Deployment (HCL Technologies)

- Designed and implemented a scalable **MLOps platform** on **AWS** using **Kubernetes** for automated model training, evaluation, and deployment.
- Built **CI/CD pipelines** with **Jenkins** to automate the build, test, and deployment of machine learning models, reducing deployment cycles by **30%**.
- Integrated **model registries** and experiment tracking tools like **MLflow** to manage model versions and metadata, improving auditability for financial services clients.

Generative AI Integration for Document Analysis (MSc Project)

- Developed a **Python** application to operationalize **LLMs** for analyzing enterprise documents, utilizing **RAG** techniques with a **vector database** (Pinecone).
- Engineered a REST API using **FastAPI** to serve LLM-generated insights, achieving a p95 latency of **250ms** for document summarization tasks.
- Implemented guardrail frameworks and prompt engineering strategies to ensure responsible AI outputs and maintain data governance for sensitive documents.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
