PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Constructed and maintained production-grade infrastructure-as-code using **Terraform** modules for deploying and managing cloud resources across multiple environments, integrated with **Azure DevOps Pipelines** for automated releases.
- Developed and implemented monitoring and telemetry solutions for enterprise security tooling, including **Microsoft Sentinel** and **Azure Monitor**, to ensure high availability and performance for downstream security teams.
- Engineered **Python** scripts to automate evidence gathering for compliance reporting against regulatory benchmarks, reducing manual effort by approximately **40%** for SOC 2 and ISO 27001 audits.
- Collaborated with Core Platform and DevOps teams to establish automated guardrails and self-service developer tooling, improving the operational maturity of the security platform portfolio.
- Supported cross-functional orchestration workflows, connecting **ITSM** platforms and messaging channels to streamline incident remediation and evidence collection for security events.
- Designed and deployed **Docker** containers for security sandboxes, enabling automated, on-demand environments for offensive security exercises and adversary simulation.
- Contributed to an internal developer portal, providing visibility into vulnerability metrics and supporting automated fix workflows for security findings.

SKILLS

Cloud Infrastructure – Terraform, Azure DevOps Pipelines, GitHub Actions, AWS, Azure, GCP

Security Tooling – Microsoft Sentinel, Azure Monitor, Log Analytics, SIEM, SOAR, EDR, NDR, XDR, SAST, DAST, CNAPP, CSPM

Programming & Scripting – Python, ARM, Bicep, KQL, Shell Scripting

Containerization & Orchestration – Docker, Kubernetes

Observability & Monitoring – SLOs, SLIs, Error Budgets, Incident Response, Blameless Postmortems

Compliance & Governance – SOC 2, ISO 27001, FedRAMP, Policy-as-Code, Checkov

PROJECTS

Automated Security Platform Deployment (HCL Technologies)

- Developed reusable **Terraform** modules for provisioning and configuring core security infrastructure, including network security groups and logging configurations on AWS.
- Integrated these modules into a **Jenkins CI/CD pipeline**, enabling automated, repeatable deployments of security tooling and reducing manual configuration errors by **30%**.
- Implemented **Python** scripts for initial data ingestion into a centralized logging system, ensuring critical security events were captured for analysis.

Compliance Evidence Automation Framework (MSc Project)

- Built a framework using **Python** and **SQL** to automate the extraction of evidence for regulatory compliance checks, targeting common benchmarks like ISO 27001.
- Developed **Power BI** dashboards to visualize compliance status and identify areas requiring remediation, presenting findings to academic stakeholders.
- Wrote **shell scripts** to orchestrate data collection from various log sources, ensuring comprehensive data for the reporting framework.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
