PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and maintained **AWS** infrastructure, including **EC2**, **S3**, and **Lambda**, ensuring high availability for multiple services.
- Developed and improved **infrastructure-as-code** scripts using **Python** to automate operational workloads and enhance developer productivity by an estimated **15%**.
- Collaborated with cross-functional **engineering**, **security**, and **DevOps** teams to implement and enforce cloud infrastructure best practices.
- Contributed to enhancing platform **reliability** through proactive monitoring and participation in incident response for critical services.
- Implemented **infrastructure security** best practices across operational processes, safeguarding sensitive data and maintaining compliance standards.
- Containerized applications using **Docker** and managed deployments within **Kubernetes** clusters, optimizing resource allocation and deployment cycles.
- Participated in peer code reviews for **infrastructure-as-code** and automation scripts, adhering to software engineering best practices.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch, API Gateway, Serverless Architectures

Programming & Scripting – Python, Bash, PowerShell, .NET, Ruby, Java

Infrastructure as Code & Config Management – Ansible, Chef, Puppet

Containerization & Orchestration – Docker, Kubernetes

CI/CD & DevOps – Jenkins, Git, Agile, DevOps

Operating Systems – Linux, Windows

Networking – DNS, Load Balancing, Firewalls

PROJECTS

Automated AWS Infrastructure Deployment

- Developed a comprehensive suite of **Python** scripts to automate the provisioning and configuration of **AWS** resources, including **VPCs**, **EC2** instances, and **S3** buckets.
- Integrated **Jenkins** pipelines to trigger automated deployments based on Git commits, reducing manual deployment time by approximately **60%**.
- Implemented logging and monitoring using **CloudWatch**, ensuring visibility into the health and performance of the deployed infrastructure.

Containerized Application Deployment Pipeline

- Engineered a CI/CD pipeline using **Jenkins** and **Docker** to build and deploy containerized applications to a **Kubernetes** cluster.
- Configured **Kubernetes** manifests for service deployment, scaling, and health checks, improving application resilience and uptime.
- Automated the process of image building and pushing to a container registry, facilitating faster and more consistent releases.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
