PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** applications, implementing REST APIs for cross-service data exchange and processing approximately **3,500 events/sec** during peak hours.
- Engineered **Python** scripts to automate ETL processes for enterprise reporting, reducing manual data compilation time by an estimated **15 hours per week**.
- Supported the integration and change management for enterprise business systems, coordinating UAT and post-go-live activities for system configuration updates.
- Collaborated with global IT teams including infrastructure, security, and project management to support warehouse management solutions and contract logistics operations.
- Analyzed and troubleshot production system issues within a **Linux** environment, performing log analysis and shell scripting to identify root causes.
- Managed production environments with strict SLAs and audit trails, contributing to the ongoing enhancement of applications supporting complex customer supply chain requirements.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing CI/CD pipelines with **Jenkins** for streamlined code delivery.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Linux, Power BI, Tableau

Methodologies – Agile, Scrum, SDLC, Change Management, Service Management

PROJECTS

Enterprise Resource Planning Integration Suite

- Developed **Java Spring Boot** microservices to facilitate data flow between an ERP system and operational platforms for a financial services client, enabling cross-system integrations via REST APIs.
- Implemented database-level data synchronization using **SQL** across **PostgreSQL** and **Oracle** databases to ensure data consistency for critical business reporting.
- Managed change control processes for system configurations and coordinated user acceptance testing (UAT) across interconnected enterprise systems.

Automated Operational Reporting Platform

- Engineered **Python** scripts to extract, transform, and load data from multiple enterprise systems into a data warehouse, supporting scheduled reporting for operational teams.
- Built interactive dashboards using **Power BI** and **DAX** measures to visualize key performance indicators related to transaction monitoring and reconciliation workflows for business stakeholders.
- Applied statistical methods and exploratory data analysis techniques to identify trends and anomalies within operational datasets.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
