HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs to support new business logic for an internal feature store, processing approximately **1,500 requests per minute**.
- Developed and maintained data pipelines using **Python** and **pandas** for ETL processes, transforming and loading data from various sources into a data warehouse, handling datasets up to **50GB**.
- Engineered **SQL** queries and database schema changes for **PostgreSQL** and **MySQL**, optimizing performance for reporting and analytical workloads, reducing average query time by **18%**.
- Contributed to code reviews and technical estimations within an **Agile/Scrum** framework, ensuring adherence to coding standards and project timelines for enterprise applications.
- Developed and maintained **Python** scripts for automating repetitive operational tasks, including log analysis and scheduled data extraction, saving an estimated **10 hours of manual work per week**.
- Containerized several Java microservices using **Docker**, creating Dockerfiles and basic orchestration configurations for consistent deployment across development and staging environments.
- Collaborated with operations teams to resolve **P1/P2 incidents** for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and ensuring SLA adherence.

SKILLS

Programming Languages – Python, Java, SQL, R, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI, Flask

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query, RStudio

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Enterprise Payments Dashboard Enhancement

- Developed **Java Spring Boot** microservices to process and enrich transaction data for a financial-services operations dashboard, supporting real-time monitoring of payment flows.
- Implemented **SQL** queries against **PostgreSQL** to retrieve and validate transaction data, ensuring data integrity for reconciliation workflows and operational alerting.
- Collaborated with business analysts to refine alert logic and reporting requirements, improving the dashboard's accuracy in identifying failed payment messages by an estimated **15%**.

Automated Data Ingestion and Reporting Pipeline

- Built a **Python**-based ETL pipeline using **pandas** to automate the ingestion of operational data from multiple disparate systems into a central data store.
- Designed and implemented automated daily reports using **Power BI**, visualizing key performance indicators for system health and transaction volumes, delivering insights to operations teams.
- Integrated the pipeline with **AWS S3** for data staging and artifact storage, ensuring reliable data handling and versioning for downstream analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
