HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for handling **API requests**, achieving p95 latency below **150ms** for core services.
- Developed and maintained **Python scripts** for automating data ingestion and ETL processes, reducing manual data preparation time by approximately **30%**.
- Managed production environments on **AWS** (EC2, S3, Lambda) and utilized **Linux** shell scripting for system administration tasks and log analysis.
- Collaborated with internal customers to develop and enhance **infrastructure applications** that meet reliability, scalability, and availability needs on **Kubernetes**.
- Implemented **observability practices**, including comprehensive monitoring and alerting across cloud services using tools like **Splunk** and **Dynatrace**.
- Responded to cloud incidents, performed **root cause analysis**, and developed corrective actions to prevent future occurrences, contributing to incident response plan development.
- Containerized applications using **Docker** and deployed them to **Kubernetes** clusters, managing configurations and resource allocation.

SKILLS

Languages – Python, Java, SQL, Go, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, HTTP Proxy, DNS, SSH, SMTP

PROJECTS

Cloud Infrastructure Automation Platform

- Engineered a **Python**-based platform for automated bare metal operating system provisioning and managing OS repositories for large-scale environments.
- Integrated with **Kubernetes** APIs to automate deployment and scaling of infrastructure services, reducing manual deployment steps by **65%**.
- Developed RESTful APIs using **FastAPI** to manage cloud resources and configurations, supporting programmatic interaction for internal teams.

High-Availability API Gateway Service

- Designed and built a **Java Spring Boot** API gateway service to handle incoming traffic, implementing rate limiting and request routing for internal services.
- Configured **HTTP proxy** and **DNS** settings to ensure high availability and fault tolerance for the gateway, managing traffic distribution across multiple instances.
- Wrote unit tests using **JUnit** and integrated with **Jenkins** for continuous integration and deployment of the gateway service.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
