HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Installed, commissioned, and verified **medical devices** at customer sites, adhering to project plans and safety protocols for a global leader in bio-decontamination technology.
- Performed preventive and corrective maintenance on **complex bio-decontamination equipment**, troubleshooting electrical, mechanical, software, and network faults to minimize system downtime.
- Executed equipment qualification and verification activities, including **IQ/OQ/PQ**, meticulously documenting results, deviations, and securing customer sign-off.
- Coordinated with laboratory managers and engineering teams at customer sites to schedule and execute service work, effectively communicating status, risks, and next steps.
- Provided on-site customer training and operational guidance for bio-decontamination systems, supporting readiness for audits and inspections.
- Maintained a high level of readiness for extensive travel and regular overtime, including after-hours support for critical deployments and incident response.
- Containerized the Bioquell control software with **Docker** and deployed to an **AWS EKS** cluster, managing configuration via Helm charts for streamlined updates across environments.

SKILLS

Field Service & Maintenance – Installation, Commissioning, Preventive Maintenance, Corrective Maintenance, Repair, Calibration, Diagnostics, Technical Support, Customer Training

Technical Skills – Electrical Troubleshooting, Mechanical Troubleshooting, Software Troubleshooting, Network Troubleshooting, Reading Schematics, Wiring Diagrams, Technical Manuals, Test Equipment

Compliance & Documentation – GMP, Quality Documentation, Service Reports, Checklists, Device History Records, Traceability, HSE, Permits, ESD

Networking – IP Addressing, Cabling, Switches, Log Analysis, Configuration Management

Cloud & Containerization – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, EKS

Programming & Scripting – Python, Java, SQL, Shell Scripting

PROJECTS

Bio-Decontamination System Installation & Validation

- Managed the end-to-end installation and commissioning of advanced **bio-decontamination equipment** at multiple enterprise customer sites, ensuring adherence to strict validation protocols.
- Executed detailed **IQ/OQ/PQ** procedures for newly installed systems, documenting all test results and deviations to ensure compliance with pharmaceutical and healthcare regulations.
- Collaborated closely with client QA and engineering departments to finalize acceptance testing and provide comprehensive operational handover training.

Field Service Automation with Python

- Developed Python scripts to automate the generation of **service reports** and device history logs from raw diagnostic data, reducing manual data entry time by approximately 40%.
- Integrated scripts with a local database (**PostgreSQL**) to manage historical service records and facilitate faster lookups during on-site troubleshooting.
- Created shell scripts for efficient log file analysis on **Linux** systems, aiding in rapid diagnosis of software and network-related faults encountered in the field.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
