PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Installed and commissioned **bio-decontamination equipment** at customer sites, ensuring adherence to project plans and safety protocols, contributing to successful deployments in **life sciences environments**.
- Performed comprehensive **preventive and corrective maintenance** on complex medical devices, troubleshooting and repairing electrical, mechanical, and software faults to minimize system downtime for clients.
- Executed **equipment qualification and verification activities**, including IQ/OQ/PQ, meticulously documenting results, deviations, and securing customer sign-off as per GMP standards.
- Provided on-site technical support and **on-demand repairs** for bio-decontamination systems, diagnosing issues across hardware and software, and restoring performance under strict service level agreements.
- Managed service documentation, including detailed **service reports and checklists**, ensuring traceability and compliance with quality system requirements for regulated environments.
- Coordinated effectively with customer stakeholders, such as lab managers and QA teams, to schedule site work, manage access, and provide clear status updates on ongoing service activities.
- Containerized and deployed internal diagnostic tools using **Docker on AWS EC2 instances**, enabling remote troubleshooting capabilities for field engineers and improving issue resolution efficiency.

SKILLS

Field Service – Installation, Commissioning, Preventive Maintenance, Corrective Maintenance, Repair, Calibration, Technical Support

Technical Skills – Electrical Troubleshooting, Mechanical Troubleshooting, Software Troubleshooting, Network Troubleshooting, Reading Schematics, Wiring Diagrams, Technical Manuals

Compliance & Quality – GMP, IQ/OQ/PQ, GCD, Quality Documentation, Service Reports, Traceability, Regulatory Compliance, HSE

Customer Facing – Customer Training, Operational Guidance, Site Coordination, Professionalism, Communication Skills, Risk Management

Tools & Technologies – Docker, AWS EC2, CloudWatch, Linux Shell Scripting, Git, Jenkins, Jira, Confluence

PROJECTS

Field Service Diagnostic Tool Deployment

- Developed a Python-based diagnostic tool to automate initial troubleshooting steps for bio-decontamination equipment, reducing on-site diagnosis time by an average of **15%**.
- Containerized the diagnostic tool using **Docker** and configured deployment pipelines with **Jenkins** for efficient distribution to field engineer laptops.
- Documented tool usage and common error resolution steps, creating an internal knowledge base article that streamlined support for junior engineers.

Customer Site Integration & Training Module

- Designed and delivered a modular training program for end-users on the operation and basic maintenance of bio-decontamination systems at a pilot customer site.
- Collaborated with customer's QA and operations teams to integrate system usage into their existing workflows, ensuring compliance with site-specific GMP requirements.
- Collected feedback from customer personnel post-training, identifying areas for procedural improvement and updating training materials accordingly.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
