PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** REST APIs and microservices for a high-volume payments platform, handling critical fraud prevention and identity validation workflows.
- Implemented **Hibernate** and **JPA** for data persistence across multiple relational databases, ensuring efficient and reliable data management for transaction processing.
- Wrote comprehensive **JUnit** and **Mockito** test suites for Java services, achieving over **85%** code coverage and reducing production defects by approximately **15%**.
- Contributed to the design and implementation of automated testing frameworks using **Selenium WebDriver** and **REST Assured**, expanding test coverage for UI and API layers.
- Integrated automated API tests into **Jenkins** CI/CD pipelines, enabling continuous validation of service deployments and reducing manual testing cycles by **40%**.
- Collaborated with developers and product teams on code reviews, focusing on improving application performance, security, and adherence to **OOP** design principles and software quality standards.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, REST Assured, TestNG, JUnit, Mockito, pandas, NumPy, scikit-learn

Testing Tools – Selenium WebDriver, SonarQube

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum

PROJECTS

Scalable Java Payments Processing Service

- Developed a **Java Spring Boot** service to ingest and process high-volume transaction data, implementing **REST APIs** for integration with upstream and downstream systems.
- Integrated **Hibernate** with a **PostgreSQL** database to manage transaction states and audit logs, ensuring data integrity for financial operations.
- Containerized the service using **Docker** and deployed to **AWS EC2**, establishing **Jenkins** pipelines for automated build, test, and deployment cycles.

Automated API Testing Framework for Financial Services

- Engineered an automated API testing framework using **Java**, **REST Assured**, and **TestNG** to validate critical business logic in a payments operations dashboard.
- Developed test scripts to cover various scenarios including transaction submission, status checks, and error handling, achieving over **90%** API endpoint coverage for core functionalities.
- Integrated the automated test suite into the **CI/CD** pipeline, providing rapid feedback on service stability and reducing the time for regression testing by **50%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
