PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed scalable, high-performance web applications using **React** and **TypeScript** for a digital transformation programme in the aviation sector, directly impacting passenger experience.
- Built and maintained back-end services using **Node.js**, designing secure **REST** and **GraphQL** APIs for integration with various internal and external systems.
- Optimized application performance and accessibility, applying modern front-end development practices to enhance user interaction across web and mobile solutions.
- Integrated applications with headless CMS platforms and third-party suppliers, ensuring seamless data flow within a large-scale digital ecosystem.
- Collaborated with architects, UX/UI designers, and QA teams to shape technical solutions, manage dependencies, and deliver high-quality outcomes in an Agile environment.
- Managed production incidents and SLA adherence for enterprise applications, performing root cause analysis and implementing corrective actions to ensure system stability.
- Containerized Java Spring Boot microservices using **Docker** and deployed them to an **AWS** environment, managing CI/CD pipelines via **Jenkins** for automated deployments.

SKILLS

Frontend – React, Next.js, JavaScript, TypeScript, HTML, CSS, Accessibility, SEO, Responsiveness

Backend – Node.js, REST APIs, GraphQL

Databases – PostgreSQL, MSSQL, MongoDB, Redis

Cloud & CI/CD – Microsoft Azure, AWS, Jenkins

Methodologies – Agile, Scrum

PROJECTS

Aviation Passenger Experience Platform

- Developed a full-stack web application using **React** and **Node.js** to streamline airport operations and enhance passenger experience, integrating with legacy airport systems.
- Designed and implemented **RESTful APIs** for data exchange between front-end interfaces and back-end services, ensuring secure and efficient data transfer.
- Containerized the application using **Docker** and configured deployment pipelines on **AWS**, improving deployment frequency and reliability.

Internal Data Processing Automation

- Automated data extraction and transformation tasks using **Python** scripting, processing approximately 15,000 records daily from various enterprise systems.
- Developed ETL pipelines to load processed data into a **PostgreSQL** data warehouse for operational reporting, reducing manual data handling by 40% for the operations team.
- Wrote SQL queries for data validation and ad-hoc reporting, supporting business analysts in understanding transaction flows and reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
