PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Python** backend services for financial transaction processing, building **RESTful APIs** and microservices that supported core business operations.
- Engineered **Python** data-driven applications, integrating with **relational databases** and optimizing data flows for business intelligence reporting.
- Collaborated with cross-functional teams, translating complex **business requirements** into scalable technical solutions for enterprise applications.
- Improved application **performance and reliability** by implementing robust error handling and efficient code practices across backend systems.
- Worked with **PostgreSQL** and **SQL** to manage and process large datasets, ensuring data integrity and facilitating complex queries for analysis.
- Participated in **code reviews** and contributed to establishing engineering best practices within the team, focusing on maintainable and clean code.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments from development to production.

SKILLS

Languages – Python, SQL, Java

Frameworks/Libraries – FastAPI, Flask, Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Tools/Technologies – Docker, Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Python-based Financial Transaction Service

- Developed a **Python** microservice using **FastAPI** to process and validate financial transactions, handling approximately 1,500 transactions per hour.
- Integrated the service with a **PostgreSQL** database, designing schemas and writing complex SQL queries for data retrieval and reporting.
- Implemented **RESTful APIs** for seamless integration with upstream and downstream enterprise systems, improving data exchange efficiency.

Automated Reporting Pipeline with Python

- Built an automated data pipeline using **Python** and **pandas** to extract data from multiple sources, including **SQL** databases.
- Developed scheduled reports that were delivered weekly to business stakeholders, providing key operational insights.
- Containerized the pipeline using **Docker** for consistent execution across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
