HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **REST APIs** using **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Developed and maintained **Python automation scripts** for ETL processes and scheduled reporting, improving data processing efficiency for internal operational workflows.
- Managed production support for enterprise Java/.NET applications, focusing on **SLA management** and conducting P1/P2 incident response using **Splunk** and **Dynatrace** for root cause analysis.
- Built and enhanced the core building blocks for customer workspaces, including **API key management**, login experiences, and admin tooling, shipping end-to-end features from backend services to the UI.
- Collaborated closely with Sales and customer teams to translate enterprise feedback into actionable improvements for workspace security and complex organizational structures.
- Scoped work as part of a large existing system, analyzing potential rollout risks and developing migration strategies for downstream teams.
- Containerized microservices using **Docker** and deployed them to a **Kubernetes** cluster (EKS), configuring Helm charts and resource limits for predictable deployments and operations.

SKILLS

Languages – Python, Java, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, Flask, FastAPI, pandas, NumPy, scikit-learn, NestJS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins

Databases – PostgreSQL, MySQL, Oracle, PostgreSQL

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Git, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD, Test-Driven Development

PROJECTS

Customer Workspace & Permissions Service

- Engineered a **Python**-based service to manage user permissions and resource access for enterprise customers, handling complex organizational hierarchies and role-based access control.
- Designed and implemented **REST APIs** using **FastAPI** to integrate with the core platform, enabling granular control over user roles and workspace configurations.
- Developed automated testing suites using **pytest** to ensure the reliability and security of permissioning logic, achieving over 90% code coverage for critical components.

Internal ML Feature Pipeline Orchestration

- Built a **Python** data pipeline on **AWS Lambda** and **S3** to extract and transform features for machine learning models, processing approximately 3,500 events per second during peak hours.
- Integrated the pipeline with **PostgreSQL** for metadata tracking and feature versioning, reducing data preparation time for ML teams by an estimated 40%.
- Containerized pipeline components with **Docker** for consistent execution across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
