# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and built **Python**-based security tooling, including **automated vulnerability scanners** and **configuration validation scripts**, integrated into CI/CD pipelines to enforce security guardrails.
- Partnered with engineering teams to conduct **application architecture reviews** and develop **threat models**, embedding secure-by-default patterns throughout the software development lifecycle.
- Identified and remediated security vulnerabilities across cloud infrastructure and product codebases, working directly with engineers to implement fixes and contribute to **secure code**.
- Implemented **supply chain security controls** for build and deployment pipelines, including artifact signing and SBOM generation, to prevent unauthorized code injection.
- Developed and deployed **infrastructure-as-code (Terraform)** modules for provisioning and managing secure cloud environments on **AWS**, adhering to strict IAM and networking policies.
- Contributed to the design and implementation of **PKI** and certificate management strategies to secure internal services and external-facing APIs.
- Containerized security tools and services using **Docker** and deployed them to a **Kubernetes** cluster, ensuring consistent and scalable operation.

## SKILLS

**Languages** – Python, Java, SQL, Typescript, Golang, Bash

**Cloud & Infrastructure** – AWS, Kubernetes, Docker, Terraform, Linux, EC2, S3, Lambda, CloudWatch, IAM, PKI

**Security Tools & Concepts** – Vulnerability Management, Threat Modeling, CI/CD Security, Supply Chain Security, SBOM, Admission Controls, Infrastructure as Code, Network Security, Certificate Management

**Development Tools** – Git, Jenkins, Jira, Confluence

**Databases** – PostgreSQL, MySQL, Oracle

## PROJECTS

### Secure Cloud Infrastructure Automation (HCL Technologies)

- Engineered **Terraform** modules to automate the provisioning of secure AWS infrastructure, including VPCs, security groups, and IAM roles, reducing manual setup time by **~60%**.
- Developed **Python** scripts to enforce security configurations post-provisioning, such as validating **S3 bucket policies** and ensuring correct **EC2 instance** security settings.
- Integrated automated security checks into **Jenkins** CI/CD pipelines, flagging non-compliant infrastructure deployments before they reached production environments.

### Containerized Security Tooling Deployment

- Packaged and containerized a suite of security scanning tools (e.g., static analysis, dependency checkers) using **Docker**.
- Deployed these containers to a **Kubernetes** cluster, configuring deployment strategies and resource limits to ensure stable and scalable operation for the security team.
- Developed basic **shell scripts** to streamline the deployment and management of the containerized security tools across different environments.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
