PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **interactive dashboards** using **Microsoft Power BI** to visualize procurement, stock, and operational data, enabling management to track key performance indicators.
- Analysed **procurement, supplier, and inventory data** to identify trends, risks, and opportunities, presenting findings and recommendations to stakeholders to support informed decision-making.
- Assisted with **stock level analysis and inventory optimisation** initiatives, contributing to improved resource planning and business performance reporting.
- Supported the implementation and effective use of **Microsoft Copilot** and other AI-assisted tools to automate reporting processes and enhance operational efficiency.
- Collaborated with cross-functional teams, including IT, procurement, and operations, to gather requirements and ensure technology solutions were embedded into daily business processes.
- Wrote **Python scripts** for data extraction and transformation from disparate sources, supporting the creation of consolidated datasets for analysis and reporting.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to service level agreements.

PROJECTS

Energywise Procurement & Inventory Analytics Dashboard

- Designed and developed a **Power BI dashboard** to provide real-time insights into procurement spend, supplier performance, and inventory levels for an energy sector client.
- Integrated data from multiple sources using **Power Query** and applied **DAX** measures to calculate KPIs such as lead times, stock turnover, and spend variance.
- Presented dashboard findings and actionable recommendations to procurement and operations management, contributing to a **15% reduction** in excess inventory over a six-month period.

Automated Supplier Spend Reporting System

- Engineered a **Python-based ETL pipeline** to extract, transform, and load supplier spend data from legacy systems into a central data repository.
- Developed automated reports using **pandas** to summarise purchasing activity and supplier performance, reducing manual reporting effort by approximately **20 hours per month**.
- Implemented data validation checks within the pipeline to ensure accuracy and consistency of supplier information, improving data quality for downstream analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
