HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** data pipelines for ETL processes, transforming large datasets from diverse sources into structured formats for analytics and reporting.
- Designed and optimized relational database schemas and queries in **PostgreSQL**, improving data retrieval efficiency for core business applications by **30%**.
- Implemented and managed **CI/CD** pipelines using **Jenkins** and **Git** for automated testing and deployment of data engineering workflows.
- Built and maintained scalable data pipelines (ETL/ELT) across cloud environments, integrating various data sources for a multinational telecommunications company.
- Collaborated with engineering and analytics teams to define and shape data models, focusing on improving data quality and usability for downstream consumers.
- Managed version control and participated in **DevOps** workflows, ensuring clean code reviews and seamless deployment of data platform components.
- Containerised data pipeline services using **Docker** and deployed them to a cloud environment, enabling consistent execution across development and production.

SKILLS

Cloud Platforms – GCP (BigQuery, Dataflow, dbt/Dataform), AWS (Glue, Lambda)

Databases – PostgreSQL, Graph Databases (Neo4j, Gremlin, Spanner)

Programming Languages – Python, SQL

Data Engineering Tools – ETL/ELT, Data Modelling, Data Quality

DevOps & CI/CD – Git, Jenkins, Docker, Kubernetes

Cloud Data Tools – Azure (Data Factory, Synapse, Databricks)

PROJECTS

GCP Data Pipeline for Telecom Analytics

- Engineered a scalable data pipeline using **GCP Dataflow** and **BigQuery** to process high-volume customer interaction data for a major telecommunications provider.
- Developed **Python** scripts for data cleansing and transformation, addressing semi-structured and unstructured data challenges to improve analytical accuracy by **22%**.
- Implemented automated testing and validation checks within the pipeline to ensure data integrity and consistency before loading into the data warehouse.

Graph Database Integration for Network Analysis

- Designed and implemented a graph database schema in **Neo4j** to model complex network relationships for a telecommunications infrastructure project.
- Developed **Python** services to ingest and query data from the graph database, enabling faster identification of network dependencies and potential fault points.
- Integrated the graph database solution with existing relational data stores using **SQL** and custom connectors, creating a unified view of network assets.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
