PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **REST APIs** for integrating external platforms with internal systems, handling approximately **1,500 requests per hour**.
- Implemented secure webhook endpoints and processing logic for event-driven data exchange, incorporating **authentication** and **error handling** mechanisms.
- Developed and executed comprehensive **integration testing** strategies, validating data accuracy and system behavior across interconnected services for a key enterprise client.
- Collaborated with client engineering teams to define technical requirements and assess integration approaches, translating business needs into detailed technical specifications.
- Troubleshot and resolved complex integration issues, performing root-cause analysis on production systems to implement practical and sustainable technical solutions.
- Authored technical documentation for integration configurations, testing outcomes, and operational support, facilitating knowledge transfer to internal support teams.
- Containerized integration services using **Docker** and deployed to **AWS EC2** instances, ensuring consistent environments and simplified deployment pipelines.

SKILLS

API Development – REST APIs, Webhooks, API Integrations, API Security, Authentication Protocols

Backend Development – Java, Spring Boot, Python, Backend Software Development

Data Handling – Data Transformations, Data Validation, Event-Driven Architectures, Data Exchange Patterns

Cloud & DevOps – AWS, Docker, CI/CD, Jenkins, Git

Databases – SQL, PostgreSQL, MySQL, Oracle

Observability – Logging, Monitoring, Error Handling, Root Cause Analysis

PROJECTS

Enterprise SaaS Integration Framework

- Developed a reusable Java Spring Boot framework for integrating multiple third-party SaaS platforms with core enterprise systems, supporting over **5 distinct client integrations**.
- Implemented robust data transformation logic and validation rules using Python scripts to ensure data consistency and adherence to target system schemas.
- Designed and documented API contracts and webhook callback specifications, enabling seamless data flow and reducing integration setup time by an estimated **30%** for new partners.

Real-time Lead Data Synchronization Service

- Built a Python-based service to synchronize lead data in near real-time between a marketing automation platform and an internal CRM system via webhooks and REST APIs.
- Implemented secure authentication mechanisms (API keys, OAuth) and comprehensive logging for all data transfer operations, ensuring data integrity and auditability.
- Configured and deployed the service on **AWS Lambda**, managing API Gateway integrations and CloudWatch logging for a scalable and resilient solution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
