PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed robust API and webhook integrations between external marketing platforms and internal client systems, ensuring secure data exchange and reliable workflow execution.
- Implemented comprehensive data transformation and validation logic within integration components, handling approximately 1,500 lead records per hour during peak campaign periods.
- Troubleshot and resolved complex integration issues across interconnected platforms, identifying root causes and deploying practical solutions to maintain operational continuity.
- Developed and executed integration testing strategies, validating data accuracy, system behavior, and performance metrics across multiple test environments.
- Collaborated with Lead Generation Activation teams to translate business requirements into detailed technical designs and integration specifications.
- Authored detailed technical documentation, including integration configurations, testing outcomes, and operational support requirements, facilitating knowledge transfer to support teams.
- Containerized integration services using Docker and deployed them to an AWS Elastic Kubernetes Service (EKS) cluster, configuring basic resource limits for predictable performance.

SKILLS

API & Webhook Development – REST APIs, Webhooks, Event-driven architectures, Data transformation, Data validation, Authentication protocols, Error handling, Logging, Monitoring

Programming Languages – Java, Python, SQL

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, EKS, Jenkins, Git

Enterprise Systems – Jira, Confluence

Data Analytics & BI – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

PROJECTS

Marketing Platform Integration Service

- Developed a Java Spring Boot service to manage real-time data synchronization between a third-party marketing automation platform and an internal CRM system.
- Designed and implemented REST API endpoints for lead data ingestion and status updates, handling an average of 2,000 API calls daily with p95 latency below 200ms.
- Integrated comprehensive logging and error handling mechanisms, reducing integration-related ticket escalations by 40% for the operations team.

Automated Lead Data Enrichment Pipeline

- Engineered a Python-based data pipeline on AWS Lambda to enrich incoming lead data with demographic information from external APIs.
- Applied data validation and cleansing techniques using pandas, reducing data quality issues in downstream marketing campaigns by approximately 15%.
- Scheduled and monitored pipeline execution using AWS CloudWatch, ensuring timely data availability for campaign activation teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
