PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **complex API-based, application-to-application, and event-driven integrations** using Boomi, processing approximately **5,000 transactions daily**.
- Led production **Kafka engineering** initiatives on Amazon MSK, defining topic and partition strategies to support a **30% increase in data throughput**.
- Developed reusable **integration components, API contracts, and error-handling patterns** that were adopted across **4 engineering teams**, improving consistency.
- Championed automation by building **CI/CD pipelines** for integration deployments using Python scripting and AWS services, reducing manual intervention by **40%**.
- Provided technical leadership by coordinating delivery across distributed teams, conducting **architecture and code reviews** for junior engineers.
- Owned production engineering quality by defining KPIs and SLAs, leading complex **Tier-3 troubleshooting** and implementing root-cause improvements for critical integration failures.
- Contributed to modernization roadmaps by assessing emerging technologies and making recommendations for cost optimization of **AWS-based integration platforms**.

SKILLS

Integration Tools – Boomi, Kafka, Amazon MSK, Kafka Connect

Cloud Platforms – AWS, IAM, EC2, S3, Lambda, CloudWatch

Programming & Scripting – Python, Bash, PowerShell

Architecture & Design – API Design, Event-Driven Architecture, Microservices, B2B Integration

Operations & Reliability – Observability, Monitoring, Incident Management, Root Cause Analysis, SLA/SLO Management, CI/CD, Automated Testing

PROJECTS

Enterprise Integration Platform Modernization (HCL Technologies)

- Re-architected legacy data transfer processes into a modern **event-driven integration flow using Apache Kafka** and Python consumers, increasing data availability for downstream systems by **20%**.
- Developed a suite of **reusable Boomi components** for common integration patterns (e.g., API orchestration, data transformation), which reduced development time for subsequent projects by an estimated **15%**.
- Implemented **automated testing frameworks** for integration processes, covering unit, integration, and performance validation, ensuring a more stable deployment pipeline.

Kafka-Based Transaction Processing System (HCL Technologies)

- Designed and deployed a **production Kafka cluster** on AWS (EC2), establishing topic strategies and replication policies to handle an average of **10,000 messages per hour**.
- Built **Python producer and consumer applications** to ingest and process financial transaction data, integrating with existing PostgreSQL databases for persistence and reporting.
- Configured **observability tooling** (Prometheus/Grafana) to monitor Kafka cluster health, producer/consumer lag, and end-to-end transaction latency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
