PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered scalable batch and streaming data pipelines for product telemetry and event streams, implementing **schema evolution** and automated backfills using Python.
- Developed and maintained **data models** for diverse analytics use cases, focusing on relational and semi-structured data, optimizing SQL queries for performance improvements.
- Implemented automated **data quality checks** and pipeline observability frameworks, establishing monitoring and alerting against established SLAs to ensure pipeline health.
- Contributed to comprehensive technical documentation and metadata repositories, mapping data lineage in collaboration with data stewards and domain owners.
- Participated actively in engineering design reviews and code reviews, collaborating with software engineering teams on event schema design and data contracts.
- Applied software engineering best practices including **Git version control**, CI/CD pipelines, and containerization (Docker) within agile development processes.
- Supported production environments for enterprise applications, focusing on **incident response** and root cause analysis for critical P1/P2 issues impacting service SLAs.

SKILLS

Data Engineering – Data Modeling, Pipeline Development, ETL, ELT, Data Quality Assurance, Data Cataloguing, Metadata Management, Data Lineage

Programming Languages – Python, SQL

Cloud & DevOps – AWS, Docker, Git, CI/CD, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence

Analytics & BI – Power BI, Tableau, DAX, Power Query, R, scikit-learn

PROJECTS

Product Telemetry Pipeline Enhancement

- Designed and implemented a Python-based ETL pipeline to ingest and process product telemetry data from multiple sources, handling approximately **5,000 events per second**.
- Integrated automated data quality checks and validation routines within the pipeline, reducing data anomaly detection time by **30%**.
- Developed comprehensive documentation for pipeline architecture, data schema, and operational runbooks, facilitating knowledge transfer to the operations team.

Customer Event Stream Processing System

- Built a streaming data processing system using Python to capture and transform event streams from client applications, ensuring adherence to defined data contracts.
- Implemented robust error handling and retry mechanisms for resilient processing of over **2,800 messages per minute**.
- Collaborated with cross-functional product teams to define event schema requirements and ensure seamless integration with downstream analytics platforms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
