PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and enhanced **Azure hub-and-spoke network architectures**, including **virtual networks**, **subnets**, and **peering configurations**, ensuring robust connectivity for enterprise applications.
- Implemented and operated advanced network security controls, such as **Network Security Groups** and **Azure Firewall**, to safeguard critical cloud infrastructure and data.
- Developed and maintained **Terraform scripts** for automated network deployment and configuration, incorporating peer review and testing into the Infrastructure as Code lifecycle.
- Monitored network health, latency, and availability using **Azure Monitor** and **Network Watcher**, proactively identifying and addressing performance bottlenecks.
- Troubleshot complex end-to-end connectivity and performance issues across cloud and hybrid environments, analyzing **DNS resolution**, **routing**, and **TLS** configurations.
- Contributed to incident response and root cause analysis for production infrastructure, authoring detailed operational procedures and **runbooks** to improve service restoration times.
- Supported hybrid connectivity solutions including **ExpressRoute** and **site-to-site VPNs**, integrating with on-premises routing and security platforms for seamless operation.

SKILLS

Cloud Networking – Azure Virtual Network, Hub-and-spoke, Virtual WAN, Peering, Subnets, User-Defined Routes, NAT Gateway, Private Link, Private Endpoints, Service Endpoints, ExpressRoute, VPN Gateway, BGP

Network Security – Network Security Groups (NSG), Azure Firewall, Web Application Firewall (WAF), DDoS Protection, Network Segmentation

Infrastructure as Code – Terraform, PowerShell, Azure CLI, Bash

Monitoring & Observability – Azure Monitor, Network Watcher, Splunk, Dynatrace

Protocols & Services – TCP/IP, DNS, DHCP, NAT, Routing, VPN, TLS, Load Balancing (Azure Load Balancer, Application Gateway, Front Door)

PROJECTS

Azure Network Resilience for Financial Services

- Engineered a resilient Azure networking solution for a financial services client, implementing **hub-and-spoke** and **Virtual WAN** architectures to enhance connectivity and isolation.
- Configured comprehensive network security using **Network Security Groups** and **Azure Firewall**, ensuring adherence to strict compliance and audit trail requirements for transaction processing.
- Automated the deployment of network infrastructure components, including **VPN Gateways** and **Private Link** configurations, using **Terraform** to enable rapid, repeatable provisioning.

Hybrid Cloud Connectivity Automation

- Developed Python scripts to automate the configuration and monitoring of hybrid cloud connectivity, specifically managing **ExpressRoute** circuits and **site-to-site VPNs**.
- Integrated on-premises routing protocols with Azure's BGP configurations, ensuring seamless data flow and low-latency communication between data centers and the cloud environment.
- Implemented health checks and alerts for hybrid network links, reducing manual verification effort by approximately **40%** and improving detection of connectivity disruptions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
