PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed customer churn prediction models using **Python** and **scikit-learn**, identifying key drivers and segmenting at-risk cohorts to inform retention strategies.
- Designed and implemented propensity models to identify cross-sell and upsell opportunities, directly supporting commercial teams in prioritizing account conversations and product engagement.
- Constructed revenue attribution frameworks by analysing data across marketing channels, sales motions, and product touchpoints, building data products that visualized revenue drivers for leadership.
- Engineered **Python** data pipelines on **AWS Lambda** and **S3** to process ~3,500 events per second, replacing a brittle scheduled-batch job and ensuring timely data availability for downstream analytics.
- Collaborated with Sales, Marketing, and Finance stakeholders to translate ambiguous commercial questions into well-scoped analytical problems, communicating complex findings clearly to non-technical audiences.
- Owned the full lifecycle of machine learning models, from feature engineering and training to production deployment and monitoring, ensuring models remained performant and retrained as needed.
- Managed production environments for enterprise applications, responding to P1/P2 incidents, performing root cause analysis, and ensuring adherence to strict SLAs using **Splunk** and **Dynatrace**.

SKILLS

Data Science – Python, scikit-learn, pandas, NumPy, R, statsmodels, A/B testing, causal inference, statistical modelling.

Data Warehousing & ETL – SQL, Snowflake, BigQuery, Redshift, Databricks, Power Query, dbt.

Cloud Platforms – AWS (SageMaker, Lambda, S3, EC2, CloudWatch), Docker, Kubernetes.

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL.

BI & Visualization – Power BI, Tableau, DAX, data modelling, report publishing.

Workflow Automation – n8n, Airflow, Prefect, Dagster.

PROJECTS

Customer Churn Prediction & Retention Analysis

- Built and deployed a **Python**-based churn prediction model using **scikit-learn** on a dataset of ~280,000 customer records, achieving an AUC of **0.86**.
- Developed feature engineering pipelines in **SQL** and **pandas** to extract behavioural and transactional data, identifying leading indicators of customer attrition.
- Presented model insights and recommended retention strategies to business stakeholders, leading to a targeted pilot program for at-risk customer segments.

Revenue Attribution Model for SaaS Product

- Designed and implemented a multi-touch attribution model in **Python** to track revenue generation across sales, marketing, and product usage touchpoints.
- Extracted and transformed data from multiple sources using **SQL** queries against a cloud data warehouse, enabling a unified view of customer journeys.
- Created interactive dashboards in **Power BI** to visualize attribution results and identify key drivers of customer acquisition and expansion.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
