HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git** to automate the build, test, and deployment of microservices, reducing deployment time by **30%**.
- Managed and evolved **multi-tenant and multi-region deployment models**, supporting the transition to a modern cloud-native environment strategy across different geographical zones.
- Built and maintained **Kubernetes-based platforms**, delivering secure and scalable developer environments, enabling self-service infrastructure provisioning for engineering teams.
- Implemented **Infrastructure-as-Code** using **Terraform** to automate the provisioning and management of cloud resources, ensuring consistency and repeatability across environments.
- Strengthened **observability, monitoring, and alerting** using tools like **Splunk** and **Dynatrace** to proactively identify and resolve issues, supporting high-quality software delivery.
- Embedded **security and compliance** into delivery workflows by integrating automated policy checks and auditability features into the CI/CD process, ensuring adherence to regulatory standards.
- Collaborated with engineering teams to troubleshoot and optimize **deployment processes and runtime environments**, improving overall system reliability and performance.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch

Container Orchestration – Kubernetes, Docker

CI/CD & Automation – Jenkins, Git, Terraform, Helm

Observability & Monitoring – Splunk, Dynatrace

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Cloud-Native Platform Modernisation at HCL Technologies

- Developed **CI/CD pipelines** using **Jenkins** and **Docker** for Java Spring Boot microservices, enabling automated deployments to AWS EC2 instances.
- Implemented **Infrastructure-as-Code** with **Terraform** to manage AWS resources, ensuring consistent and repeatable environment provisioning for development and testing.
- Integrated **Splunk** for log aggregation and monitoring across the application stack, aiding in faster issue detection and root cause analysis for production incidents.

Automated Deployment and Observability for Financial Services Dashboard

- Engineered automated deployment scripts using **Python** and **Bash** for a financial services operations dashboard, reducing manual deployment effort by **40%**.
- Configured **Kubernetes** clusters to host microservices, managing container orchestration and service discovery for improved application resilience.
- Enhanced **monitoring and alerting** capabilities using **Dynatrace**, providing real-time insights into transaction processing performance and system health.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
