HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, designing and implementing **RESTful APIs** for cross-service data exchange, including request validation and circuit-breaker patterns.
- Engineered backend services using **Python**, building **data pipelines** for ETL processes and automating scheduled reporting tasks for enterprise systems.
- Managed production support for enterprise applications, performing **SLA management** and **P1/P2 incident response** using **Splunk** and **Dynatrace** for log analysis and performance monitoring.
- Collaborated with cross-functional teams, including product managers and designers, to deliver new features and enhancements for full stack web applications, participating in **Agile ceremonies**.
- Designed and developed responsive and intuitive **front-end interfaces** using **React**, focusing on user experience and maintainability.
- Contributed to the improvement of **CI/CD pipelines** and automated testing processes, ensuring reliable and efficient deployment of applications.
- Integrated applications with third-party services and **financial platforms**, ensuring secure and efficient data flow across systems.

SKILLS

Backend Development – Java, Spring Boot, Python, Node.js, Microservices, RESTful APIs

Frontend Development – JavaScript, TypeScript, React, Angular, Vue.js

Databases – PostgreSQL, SQL Server, MongoDB, Relational Databases, NoSQL Databases

Cloud Platforms – AWS, Azure, Google Cloud, EC2, S3, Lambda, CloudWatch

DevOps & CI/CD – Git, Jenkins, Docker, Kubernetes, CI/CD pipelines, Automated Testing

Methodologies & Practices – Agile, Scrum, Software Engineering Principles, Design Patterns, Secure Coding Practices, Problem-Solving

PROJECTS

Enterprise Java Microservices for Financial Operations

- Developed a suite of **Java Spring Boot** microservices to support a financial services operations dashboard, focusing on transaction monitoring and operational alerting.
- Implemented robust **RESTful APIs** for inter-service communication and integrated with **PostgreSQL** for persistent data storage, handling approximately 2,800 transaction events per hour.
- Containerized the microservices using **Docker** and deployed them to an **AWS** environment, ensuring scalability and efficient resource utilization.

Python-based Data Pipeline for Transaction Reconciliation

- Built an automated **Python** data pipeline to process and reconcile financial transaction data, significantly reducing manual effort for the operations team.
- Engineered data extraction and transformation logic using **pandas** and **SQL**, processing datasets of up to 500,000 records weekly.
- Developed scheduled reporting scripts that generated key operational metrics, providing insights into reconciliation discrepancies for business analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
