PROJECTS

Energy Services Operations Management System

- Developed a Python-based system to streamline the logging and tracking of customer inquiries and job progress for an energy services provider.
- Implemented features for managing grant administration paperwork and customer certificate generation, reducing manual processing time by an estimated **30%**.
- Integrated a simple interface for updating website job content, ensuring information was current for potential customers.

Office Administration Efficiency Tool

- Created a Python script to automate the organisation and filing of job folders and associated documentation for installation teams.
- Designed a system for tracking outstanding paperwork and customer information, improving follow-up efficiency for administrative staff.
- Built a basic module for managing and collating customer feedback from online reviews.
