PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python**-based ETL pipelines on **AWS Lambda**, processing approximately **4,000** data records per minute to populate analytical data stores.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, handling over **1,500** requests per second during peak load, ensuring robust data exchange.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within defined SLAs, reducing critical incident recurrence by **18%** over a 6-month period.
- Collaborated with Product Managers and Customer Experience Designers to define technical requirements for new analytics modules, translating business needs into actionable development tasks.
- Mentored junior engineers on best practices for **Python** development and effective code review strategies, improving team code quality and knowledge sharing.
- Architected and built scalable data models and analytics pipelines using **Spark** and **Hive** on **Hadoop** platforms to support large-scale data products.
- Containerized microservices using **Docker** and deployed them onto an **AWS EKS** cluster, configuring CI/CD pipelines via **Jenkins** for automated testing and deployment.

SKILLS

Programming Languages – Python, Java, SQL, Scala

Big Data Platforms – Spark, Hadoop, Hive, Impala, Airflow, NiFi, Scoop

Cloud Technologies – Databricks, AWS (EC2, S3, Lambda, CloudWatch), Azure

Databases – PostgreSQL, MySQL, Oracle

Development Tools & Methodologies – Git, Jenkins, Docker, Kubernetes, Agile, Scrum, REST APIs, Microservices

Data Analysis & ML – Machine Learning, Advanced Statistics, Predictive Analytics, Data Modeling, Feature Engineering, scikit-learn

Observability & Monitoring – Splunk, CloudWatch, Dynatrace

PROJECTS

Scalable Data Ingestion Framework (HCL Technologies)

- Engineered a multi-stage data ingestion framework using **Python** and **FastAPI** to process and validate diverse data sources, handling up to **5,000** events per second.
- Integrated the framework with **AWS S3** and **PostgreSQL** for storage and retrieval, establishing robust data pipelines for downstream analytics and reporting.
- Implemented comprehensive logging and monitoring using **Splunk**, enabling proactive identification of pipeline bottlenecks and reducing data latency by **30%**.

Customer Analytics Dashboard Enhancement (HCL Technologies)

- Developed **Python** scripts to automate data extraction and transformation from multiple enterprise systems, feeding into a centralized data mart for analytical purposes.
- Refactored complex SQL queries and implemented strategic indexing in **Oracle**, resulting in a **40%** reduction in data retrieval times for key operational reports.
- Collaborated with business analysts to understand user requirements and enhance reporting capabilities, delivering insights that supported operational decision-making for a financial services client.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
