PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Go microservices** for event-driven systems, processing approximately **4,500 events per second** using channels and message brokers.
- Authored **clean, idiomatic Go code** with comprehensive **unit and integration tests**, achieving over **85% code coverage** for critical service components.
- Developed **REST and gRPC APIs** with clear contracts and versioning for inter-service communication, ensuring seamless integration across distributed components.
- Contributed to **CI/CD pipelines** using **GitHub Actions**, automating build, test, and deployment processes for services running on **Kubernetes**.
- Participated in **design and code reviews**, providing constructive feedback and contributing to architectural decisions for scalable backend systems.
- Collaborated with clients and stakeholders to translate business requirements into actionable technical solutions, ensuring alignment with project goals.
- Managed **production support** for services deployed on **AWS**, focusing on observability through **Prometheus** and **Grafana** for proactive issue detection.

SKILLS

Languages – Go, Python, Java, SQL

Backend Development – Microservices, Distributed Systems, REST APIs, gRPC, Protocol Buffers, Concurrency, Goroutines, Channels, Error Handling, Context, Modules

Cloud & DevOps – AWS, Docker, Kubernetes, GitHub Actions, Jenkins, Infrastructure as Code

Databases – PostgreSQL, Redis, MongoDB, DynamoDB

Messaging & Observability – Kafka, RabbitMQ, NATS, Prometheus, Grafana, OpenTelemetry, Datadog, Splunk, Dynatrace

Security – OAuth2, OIDC, TLS, Secrets Management, PCI-DSS, SOC 2, ISO 27001

PROJECTS

Scalable Go Microservice for Transaction Processing

- Engineered a high-throughput **Go microservice** to process financial transactions, handling up to **3,800 transactions per minute**.
- Implemented **event-driven architecture** using **Kafka** and Go channels, ensuring reliable message delivery and fault tolerance for critical operations.
- Designed and documented **gRPC APIs** with **Protocol Buffers** for efficient communication with downstream services and integrated with **PostgreSQL** for data persistence.

Cloud-Native API Gateway with Go

- Developed a **Go-based API Gateway** to manage and route incoming requests for multiple backend services, improving request handling efficiency by **20%**.
- Integrated **Docker and Kubernetes** for containerization and orchestration, enabling scalable deployments on **AWS** infrastructure.
- Implemented **RESTful API** endpoints with robust error handling and security measures, including **OAuth2** authentication flows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
