PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Automated incident response and system monitoring for enterprise applications using **Splunk** and **Dynatrace**, consistently meeting SLA targets across 15+ production systems.
- Developed **Python** scripts to streamline ETL processes for operational reporting, reducing manual data extraction time by approximately 40% for the financial-services client.
- Managed and executed production support tasks for critical Java Spring Boot applications, addressing P1/P2 incidents within defined SLAs and performing root cause analysis.
- Designed and implemented **Java Spring Boot** REST APIs to facilitate cross-system integrations, enhancing data flow between core banking platforms and ancillary services.
- Containerized microservices using **Docker**, contributing to the deployment pipeline for new features on AWS EC2 instances.
- Collaborated with cross-functional teams to troubleshoot and resolve complex production issues, ensuring system stability and adherence to operational best practices.
- Maintained and enhanced **relational databases** (PostgreSQL, Oracle, MySQL) through schema updates, data validation scripts, and performance tuning for enterprise business systems.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, RStudio

PROJECTS

Financial Operations Dashboard Enhancement

- Enhanced a **payments operations dashboard** for a financial-services client by developing **Python** scripts to automate the parsing and alerting of failed transaction messages, processing approximately 3,200 alerts weekly.
- Implemented **Java Spring Boot** microservices to process and display near real-time transaction monitoring data, improving visibility for operational teams.
- Integrated new data sources into the existing dashboard via REST APIs, enabling comprehensive reconciliation workflow analysis across interconnected systems.

Enterprise Systems Integration Automation

- Automated **ERP** system configuration updates and data validation checks using **Python** and **SQL**, reducing manual effort in change management processes by an estimated 30%.
- Developed **REST APIs** in **Java Spring Boot** to support cross-system integrations, ensuring seamless data exchange between the ERP and other operational platforms.
- Managed UAT coordination and post-go-live support for system configuration changes, ensuring smooth transitions and adherence to change-control procedures.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
