HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core backend services, handling approximately **3,500 events/sec** during peak hours.
- Designed and implemented a **Hibernate**-based persistence layer for a new financial transaction processing module, ensuring data integrity and efficient querying across a **PostgreSQL** database.
- Wrote comprehensive **JUnit** tests and employed test-first development practices for new Java features, achieving over **85% code coverage** for critical modules.
- Built and enhanced **ETL pipelines** using Python and SQL to process, validate, and aggregate large volumes of cinema transaction data, contributing to platform modernisation.
- Optimised **SQL queries** and managed database schema changes for backend services operating on **PostgreSQL** and SingleStore, improving report generation times by **18%**.
- Collaborated with product managers and engineering leads to define technical requirements and estimate effort for new backend features within an **Agile/Scrum** framework.
- Containerised backend services using **Docker** and deployed them to a **Kubernetes** cluster (EKS), configuring basic resource limits and health checks.

SKILLS

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks/Libraries – Spring Boot, Jakarta EE, JAX-RS, CDI, Servlets, Hibernate, JUnit, pandas, NumPy

Databases – PostgreSQL, SingleStore, MySQL, Oracle, Redis

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, GitLab CI

APIs/Integration – REST APIs, JWT, OAuth2, JDBC, Data Integration, ETL, Batch Processing

Tools – Jira, Confluence, Splunk, Dynatrace, Git, TomEE/Payara

AI Tools – Claude Code, OpenAI Codex

PROJECTS

Cinema Transaction Data Integration Platform

- Engineered a **Java Spring Boot** application to ingest and process high volumes of cinema transaction data, building robust **REST APIs** for data aggregation.
- Developed **ETL pipelines** using Python and **SQL** to clean, validate, and transform raw transaction logs from multiple sources, feeding into a central data warehouse.
- Implemented caching strategies with **Redis** to improve the performance of frequently accessed data for analytics dashboards, reducing average response times by **30%**.

Backend Service Modernisation with Hibernate and PostgreSQL

- Refactored legacy Java backend services to adopt modern **Jakarta EE** standards and **Spring Boot**, improving maintainability and scalability.
- Integrated **Hibernate** ORM with **PostgreSQL** to manage persistence for core business logic, including complex transaction management and query optimisation.
- Enhanced API security by implementing **JWT** authentication for REST endpoints, ensuring secure data access for internal and external clients.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
