HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and enhanced backend services using **Java** and **Spring Boot**, implementing robust RESTful APIs for cross-service communication.
- Designed and implemented data models and wrote complex **SQL** queries for a large-scale enterprise data processing system, ensuring data integrity.
- Contributed to the development of a key automotive enterprise service, writing clean, maintainable **Java** code and participating actively in **code reviews**.
- Collaborated with software engineers and architects to translate business requirements into technical solutions for a new cloud-based platform initiative.
- Created comprehensive **unit and integration tests** using JUnit to ensure application functionality and reliability for critical backend components.
- Participated in **Agile ceremonies**, including sprint planning and daily stand-ups, contributing to technical discussions and effort estimations.
- Containerized backend applications using **Docker** and deployed them to a cloud environment, supporting efficient software delivery pipelines.

SKILLS

Languages – Java, SQL, Python, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Service with PostgreSQL Integration

- Developed a **Java Spring Boot** microservice to manage core enterprise data processing workflows, integrating with a **PostgreSQL** database.
- Designed and implemented RESTful APIs for external system interactions, ensuring seamless data exchange and adherence to API design best practices.
- Authored comprehensive **JUnit tests** to cover critical business logic, achieving over 85% code coverage for the core service modules.

Automotive Data Ingestion and Processing Pipeline

- Engineered a **Python**-based data pipeline to ingest and process automotive telemetry data from various sources, transforming raw data into actionable insights.
- Utilized **pandas** and **NumPy** for efficient data manipulation and analysis, handling large datasets with structured transformations.
- Implemented scheduled reporting scripts using **SQL** to generate daily summaries for operations teams, improving visibility into data flow status.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
