HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and executed automated test scripts using **Java** and **REST Assured** for backend services, achieving **85% API coverage** across critical workflows.
- Integrated automated test suites into **Jenkins** CI/CD pipelines, reducing manual regression cycles by approximately **40%** and enabling faster release cadence.
- Investigated complex test failures and production issues in asynchronous, event-driven systems, performing root cause analysis using **Splunk** logs and **Dynatrace** traces to identify defects.
- Mentored junior engineers on **best practices** for test automation, code reviews, and effective utilization of **Jira** for agile sprint planning and task tracking.
- Designed and maintained **contract tests** for microservices communication, ensuring adherence to API schemas and preventing integration issues in a distributed environment.
- Collaborated with development and program management teams to define test cases that validate software functionality and harden components, contributing to a **Quality First culture**.
- Containerized test automation frameworks using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent execution environments and efficient resource management.

SKILLS

Languages – Java, Python, SQL, TypeScript, R

Testing Tools – REST Assured, Selenium WebDriver, Playwright, JUnit, Mockito

API & Protocols – REST APIs, HTTP, JSON, OAuth, JWT, gRPC, GraphQL

CI/CD & Version Control – Jenkins, GitHub, Git

Cloud & Containerization – AWS, Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, SQL

Observability – Splunk, Dynatrace, CloudWatch

PROJECTS

Automated API Testing Framework for Enterprise Services

- Developed a scalable **Java**-based API testing framework using **REST Assured** to validate complex backend services, covering approximately **300+ endpoints**.
- Implemented robust **error handling** and reporting mechanisms, providing detailed logs and summaries for failed test cases, reducing debugging time by an estimated **25%**.
- Integrated the framework with **Jenkins** for automated execution on code commits, enabling continuous integration and early detection of regressions in the **microservices architecture**.

Event-Driven System Reliability Testing

- Designed and implemented integration tests for asynchronous, event-driven systems, focusing on message queue processing and inter-service communication patterns.
- Utilized **Python** scripting to simulate high-volume event streams and measure system responsiveness, identifying potential bottlenecks under load.
- Debugged issues across cooperating services by analyzing logs and traces from **AWS CloudWatch**, contributing to improved system stability and reliability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
