PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot microservices** to handle asynchronous event processing, integrating with internal messaging queues for improved data flow between distributed systems.
- Engineered a **Python-based ETL pipeline** to ingest, transform, and load data from disparate sources into a centralized data warehouse, supporting scheduled reporting for enterprise business systems.
- Developed and maintained **RESTful APIs using Java Spring Boot** for cross-system integrations, ensuring robust data exchange and adherence to strict change-control management for system configuration updates.
- Collaborated with product managers and data scientists to translate ambiguous problems into well-defined requirements for scalable analytics platform features, shaping concepts into production-ready services.
- Participated in **code reviews and sprint planning**, providing technical estimations and contributing to agile ceremonies to ensure timely delivery of platform enhancements.
- Deployed and operated **distributed microservices on AWS**, focusing on reliability and performance, and automated infrastructure provisioning using **CloudFormation**.
- Troubleshot production incidents with urgency and judgment, using **AI-assisted workflows** and observability tools to accelerate root cause analysis and minimize impact on customer experience.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Spring, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Technologies – PostgreSQL, MySQL, Oracle, Apache Kafka, Apache Druid, Apache Flink

DevOps/Infra – Docker, Kubernetes, Jenkins, Git, Ansible, CloudFormation, Terraform

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

PROJECTS

Scalable Event Processing Platform (HCL Technologies)

- Developed a **Java Spring Boot application** to process high-volume event streams, implementing fault-tolerant mechanisms and asynchronous message handling for a financial-services client.
- Integrated the event processing service with **Apache Kafka** for reliable data ingestion and distribution, enabling downstream analytics and real-time monitoring capabilities.
- Containerized the application using **Docker** and deployed it to an **AWS ECS cluster**, establishing CI/CD pipelines with Jenkins for automated builds and deployments.

Customer Analytics Dashboard Implementation

- Built interactive **Power BI dashboards** to visualize key customer experience metrics derived from large event streams, providing actionable insights to product teams.
- Developed **SQL queries and Power Query transformations** to extract, clean, and model data from various sources, ensuring data integrity for reporting.
- Collaborated with business stakeholders to gather requirements and iterate on dashboard designs, translating complex data into easily understandable visualizations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
