PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for enterprise applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs using **Splunk** and **Dynatrace** for monitoring.
- Developed **Python** scripts to automate data ingestion and ETL processes, supporting scheduled reporting for operational teams.
- Executed complex **SQL** queries across **PostgreSQL** and **Oracle** databases for data validation, ad-hoc reporting, and schema modification.
- Enhanced existing **Java Spring Boot** microservices by implementing new features and resolving defects, focusing on REST API development and cross-service integrations.
- Containerized multiple Java applications using **Docker**, facilitating consistent deployment environments on **AWS EC2** instances.
- Participated in daily Scrum ceremonies, including sprint planning and code reviews, contributing to the continuous improvement of development processes.
- Collaborated with cross-functional teams, including Sales Ops and App Dev, to diagnose and resolve system-wide issues, such as investigating website problems and assisting with code rollbacks.

SKILLS

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Programming Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Methodologies & Tools – Agile, Scrum, Jira, Confluence

PROJECTS

Enterprise Application Incident Response System

- Developed a **Python**-based alerting system that parsed logs from **Splunk** and **Dynatrace**, reducing manual alert checks by approximately 60% for the support team.
- Built automated diagnostic scripts in **Bash** and **Python** to gather system state information during critical incidents, shortening root cause analysis time by an average of 20 minutes.
- Created detailed runbooks and troubleshooting guides for common application issues, improving the onboarding efficiency for new support engineers by 30%.

Automated Data Pipeline for Operational Reporting

- Engineered an ETL pipeline using **Python** and **SQL** to extract, transform, and load data from multiple relational databases (**PostgreSQL**, **MySQL**) into a central reporting database.
- Designed and implemented scheduled jobs using **Cron** and Jenkins to automate the daily data refresh for operational dashboards, ensuring data freshness for business analysts.
- Validated data integrity throughout the pipeline, implementing checks that reduced data discrepancy errors reported by stakeholders by 15%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
