## PROFESSIONAL EXPERIENCE — 3.5 YEARS

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Collected and analysed environmental data, including **energy consumption** and **waste generation**, across multiple operational sites to support sustainability reporting.
- Assisted with the maintenance of **ISO 14001 Environmental Management System** documentation and operational procedures, contributing to continuous improvement initiatives.
- Supported compliance monitoring by tracking key environmental metrics and compiling data for internal performance reports, ensuring adherence to regulatory guidelines.
- Coordinated with various departments to raise awareness of environmental objectives and promote sustainable practices, facilitating cross-functional engagement on key initiatives.
- Assisted with decarbonisation project planning by gathering data on **carbon emissions** from operational activities and product lifecycles.
- Contributed to environmental inspections and audits by preparing relevant documentation and supporting the on-site review process.
- Developed and maintained **Python scripts** for automating the collection and initial processing of environmental data from disparate sources, reducing manual data entry time by approximately **20%**.

## SKILLS

**Environmental Management** – Sustainability, Environmental Management Systems, ISO 14001, ISO 50001, Carbon Accounting, ESG Reporting, EcoVadis, Waste Management, Energy Consumption Monitoring, Water Usage Monitoring, Carbon Emissions Tracking, Compliance Monitoring

**Data Analysis & Reporting** – Data Collection, Data Analysis, Environmental Metrics, Sustainability Reporting, Performance Reporting, Microsoft Excel, Microsoft Office

**Programming & Automation** – Python, Shell Scripting, Scripting

**Project Coordination** – Initiative Support, Cross-functional Collaboration, Audits, Inspections, Continuous Improvement

**Domain Knowledge** – Manufacturing Environment, Climate Action, Responsible Sourcing, Product Carbon Footprint

## PROJECTS

### Environmental Data Aggregation Platform (HCL Technologies)

- Developed a **Python**-based system to aggregate environmental data, including **energy consumption** and **waste generation** metrics, from multiple factory locations.
- Automated data parsing and initial validation routines, improving data accuracy and reducing processing time for weekly reports by an estimated **18%**.
- Designed data structures to support future integration with an **ISO 14001** compliant environmental management system.

### Sustainability Metrics Dashboard (MSc Project)

- Created an interactive **Power BI** dashboard to visualise key sustainability indicators such as **carbon emissions**, water usage, and recycling rates.
- Applied **DAX** measures and **Power Query** for data transformation and analysis of a simulated manufacturing dataset.
- Presented the dashboard to academic stakeholders, demonstrating clear insights into environmental performance trends.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
