PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Automated deployment and operational tasks across **AWS** infrastructure, enhancing the reliability of multi-tenant SaaS systems.
- Engineered and maintained a **SAML/OAuth**-based single sign-on authentication platform, ensuring secure and seamless user access.
- Developed comprehensive **observability tooling**, including metrics and dashboards, to support global platform infrastructure stability.
- Improved incident management lifecycle by identifying and mitigating reliability risks, contributing to a self-healing environment.
- Collaborated with core product developers to ensure cloud products met non-functional requirements for availability and performance.
- Wrote system documentation and training materials to empower teammates on platform operations and reliability best practices.
- Containerized **Java Spring Boot** microservices using **Docker** and deployed them to **Kubernetes (EKS)**, managing configurations with Helm.

SKILLS

Cloud & DevOps – AWS, Kubernetes, EKS, Docker, Helm, Terraform, Terragrunt, Git, Bitbucket, Jenkins, Flux CD, TeamCity, IaC, GitOps

Languages & Scripting – Python, Bash, Go, Java, SQL

Security & Authentication – SSO, SAML, OAuth, Okta

Observability & Databases – Datadog, CloudWatch, PagerDuty, Kafka, AWS SQS, Aurora Postgres, Oracle RDS

Methodologies – Agile, Scrum, Kanban

PROJECTS

Cloud Platform Automation Suite

- Developed a suite of **Python** scripts to automate common **AWS** infrastructure provisioning and configuration tasks on EC2 instances, reducing manual setup time by approximately 40%.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git** for automated testing and deployment of microservices to a **Kubernetes (EKS)** cluster.
- Created custom **Bash** scripts for log aggregation and analysis from distributed systems, aiding in faster incident root cause identification.

SaaS System Observability Enhancement

- Designed and implemented real-time monitoring dashboards using **CloudWatch** and **Datadog** to track key performance indicators and system health for customer-facing applications.
- Integrated **PagerDuty** for automated incident alerting and escalation based on predefined thresholds and anomaly detection from system metrics.
- Developed **SQL queries** against **Aurora Postgres** to extract operational data for performance analysis and capacity planning reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
